## EXECUTIVE SUMMARY

In 2021, the Florida Department of Health in Palm Beach County (DOH-PBC) and the Health Care District of Palm Beach County (HCD) enlisted the Health Council of Southeast Florida (HCSEF) to facilitate a comprehensive Community Health Assessment (CHA) and Community Health Improvement Plan (CHIP). As part of this process, the Palm Beach County Community Health Advisory Council, comprised of a diverse group of local public health system partners and stakeholders, was also engaged to inform and guide CHA and CHIP development.

From January 2022 through June 2022, the Advisory Council convened to: 1) discuss the gaps in services and challenges facing Palm Beach County residents, based on the quantitative and qualitative CHA findings, 2) share their perspectives and experiences as local public health system representatives, and 3) develop a plan to address those needs. The Advisory Council reviewed key health indicators from the CHA, which were stratified by race and ethnicity, to highlight disparities and determine the top health priorities in Palm Beach County. Through a series of meetings facilitated by HCSEF, the Advisory Council crafted goals, objectives, strategies, and activities to address each priority area and, ultimately, developed the CHIP. The Palm Beach County CHIP aims to address public health priorities by identifying which community partners and stakeholders will work on each priority area and how their individual organizations will support improving progress towards activities and health improvement strategies in Palm Beach County. The 2022 – 2027 Palm Beach County CHIP strategic priority areas are as follows:

- **Chronic Disease Prevention and Self-Management**
- **Mental and Behavioral Health**
- **Access and Linkages to Health and Human Services**

The Palm Beach County Community Health Advisory Council will continue to meet biannually to report on efforts, assess progress, and refine the plan as needed to improve the health of Palm Beach County residents. The Health Advisory Council membership will continue to evolve over the implementation of the CHIP to ensure the inclusion of diverse perspectives and engagement among partners with various lived experience and expertise. Continuous outreach is conducted to recruit new members through the partnership, and efforts are made to retain and actively engage existing members.

Thanks to the dedication of the Palm Beach County Community Health Advisory Council, the CHIP is a thorough and executable plan that Palm Beach County partners and stakeholders can use to guide community health planning activities in the coming years. We invite you to review this Plan and consider how you can engage in these efforts to create a healthier Palm Beach County.

## ACKNOWLEDGEMENTS

**This Community Health Improvement Plan is dedicated in health and wellness to the residents of Palm Beach County.**

The Florida Department of Health in Palm Beach County, the Health Care District of Palm Beach County, and the Health Council of Southeast Florida would like to thank the partnering organizations and residents who contributed to this effort. At its core, this plan aims to create a healthier, more equitable Palm Beach County. Without the voices of the local public health system and residents, such change would not be possible.

“You don’t make progress by standing on the sidelines...You make progress by implementing ideas.”

*-Shirley Chisholm*

## INTRODUCTION

### Community Health Assessment

In 2021, the Florida Department of Health in Palm Beach County (DOH-PBC) and the Health Care District of Palm Beach County (HCD) engaged the Health Council of Southeast Florida (HCSEF) to facilitate a comprehensive Community Health Assessment (CHA) for Palm Beach County. Throughout the CHA process, primary data collection was conducted with residents through focus groups in English, Spanish, and Haitian Creole to understand needs, concerns, and experiences with local public health issues. In addition to resident voices, the CHA captured key stakeholder perspectives from leaders across the county through Key Informant Interviews. The Local Public Health System, which consists of all of the agencies that provide essential public health and social services in Palm Beach County, was also assessed and scored by stakeholders to understand gaps in care and potential areas for improvement.

Additionally, HCSEF gathered and analyzed secondary health data, such as disease trends over time, to assess the county's overall health. HCSEF compiled data related to demographics, socioeconomic status, COVID-19, maternal health, morbidity, mortality, behavioral and mental health, and health resource availability and access. When possible, the secondary CHA data was disaggregated by race, ethnicity, and census county division to highlight disparities and key opportunities for advancing health equity within the county. Once the CHA was compiled, the findings were published for community members and stakeholders to vet the data, review the current health issues in the county, and understand trends. Moreover, the Palm Beach County Community Health Advisory Council members were called upon to be ambassadors of the CHA to further disseminate the findings throughout their networks, organizations, and communities. These CHA ambassador presentations provided an opportunity for additional education and awareness of the CHA process and findings, as well as an opportunity for additional community input.

### Community Health Improvement Plan

As part of the next phase, using the findings from the CHA, HCSEF worked with partners throughout the county to facilitate and develop the 2022 – 2027 Palm Beach County Community Health Improvement Plan (CHIP). While the 2022 CHA identified health issues in the community, the 2022 – 2027 CHIP aimed to advance health equity and address the social determinants of health to improve health outcomes throughout Palm Beach County. As a starting point, the Advisory Council reviewed key indicators to determine the areas of greatest need throughout the community. Throughout the CHIP development process, subject-matter experts provided key perspectives and applied the local context to the CHA data by sharing their insights at the development meetings, as a way for partners and stakeholders to understand the “story behind the data.”

Next, the Advisory Council determined priority areas based on identified disparities, gaps in care or services, potential impact, currently available community resources, and overall opportunities for improvement. Advisory Council members also considered Healthy People 2030 and the Florida State Health Improvement Plan priorities, ensuring alignment with national and state-level efforts to increase impact at the local level. The strategic priority areas identified for the 2022 – 2027 Palm Beach County CHIP are as follows:

- **Chronic Disease Prevention and Self-Management**
- **Mental and Behavioral Health**
- **Access and Linkage to Health and Human Services**

Once the priority areas were determined, the Advisory Council participated in a root cause analysis to determine the root causes of the priority health issues and developed targeted goals, objectives, and evidence-informed strategies to address the issues. In addition, Advisory Council members assigned key partners and determined action steps to ensure responsible leadership and implementation of community health improvement activities, thereby creating an actionable plan.

Ultimately, the CHIP aims to contribute to the improvement of the health and quality of life of Palm Beach County residents. Partners were adamant about applying both a health equity lens and placing an emphasis on improving the social determinants of health throughout the plan. This plan is a collaborative, iterative process that partners will regularly monitor and evaluate to ensure the needs of residents are being met every step of the way. The Health Advisory Council continues to welcome and engage new members, which offers the opportunity to expand on available resources and knowledge to address the health needs identified in the CHIP, and to ensure diverse perspectives and representation of community members and organizations in the partnership.

## SOCIAL DETERMINANTS OF HEALTH

The Palm Beach County Community Health Advisory Council members fundamentally understand that health does not exist in a silo. Various aspects of an individual's life contribute to health outcomes; thus, the local public health system must develop and implement policies, systems, and environmental changes that improve the social determinants of health, or "conditions in which people are born, grow, live, work, and age."<sup>2</sup> Differential distribution of resources and systemic issues lead to differences in these conditions and health inequities that are unfair, unjust, and avoidable. By addressing the social determinants of health to remove systemic barriers inhibiting residents from reaching their optimal health and to mitigate adverse health outcomes at their root cause, communities can work to advance and achieve health equity.<sup>2</sup> As such, in addition to the emphasis placed on health equity throughout the planning and implementation process, the Palm Beach County Community Health Advisory Council integrated upstream approaches and strategies to improve the social determinants of health and address health inequities in the 2022 – 2027 CHIP.

Throughout the 2022 Palm Beach County CHA, HCSEF gathered and analyzed social determinant of health data, including indicators related to education, health care access, economic stability, neighborhood and built environment, and the social and community context. While vetting this data, Advisory Council members drew connections between health conditions and the social determinants of health. To further illustrate, Advisory Council members were challenged to consider the impact of the social determinants of health through exercises such as root cause analysis and group discussions. During these discussions, the Advisory Council's diverse, dedicated members provided first-hand insights into the effects of the social determinants of health on health outcomes.

The Advisory Council consisted of a diverse group of community agencies and partners that address different social determinants of health and serve various segments of the community, including diverse neighborhoods, income levels, racial and ethnic backgrounds, ages, languages, documentation statuses, and insurance statuses, which ensured diverse community representation. These insights were invaluable throughout the development of the Palm Beach County CHIP, in that they ensured the Plan not only considers the social determinants of health, but also addresses these factors as root causes to actively drive change for Palm Beach County residents. As can be seen throughout the Plan, an emphasis is placed on taking upstream approaches and, with the third priority area, Access and Linkage to Health and Human Services, key social determinants of health are directly addressed.

## OUR EFFORTS AND IMPACT: PALM BEACH COUNTY 2017-2022 CHIP HIGHLIGHTS

The 2017 – 2022 Palm Beach County CHIP contributed to improved health outcomes for county residents, increased resources and capacity within the local public health system, and increased engagement among residents in various health activities. This iterative, ongoing process was an important process to understand efforts that improve health. The previous CHIP covered three priority areas: Mental and Behavioral Health, Active Living and Health Lifestyles, and Access to Care and Services. The following section highlights some of the changes seen within the 2017 – 2022 CHIP priority areas. While all of these changes cannot be attributed directly to the CHIP, efforts made within the CHIP contributed to these improvements.

Figure 1: Palm Beach County CHIP 2017-2022: Mental and Behavioral Health Success Summary

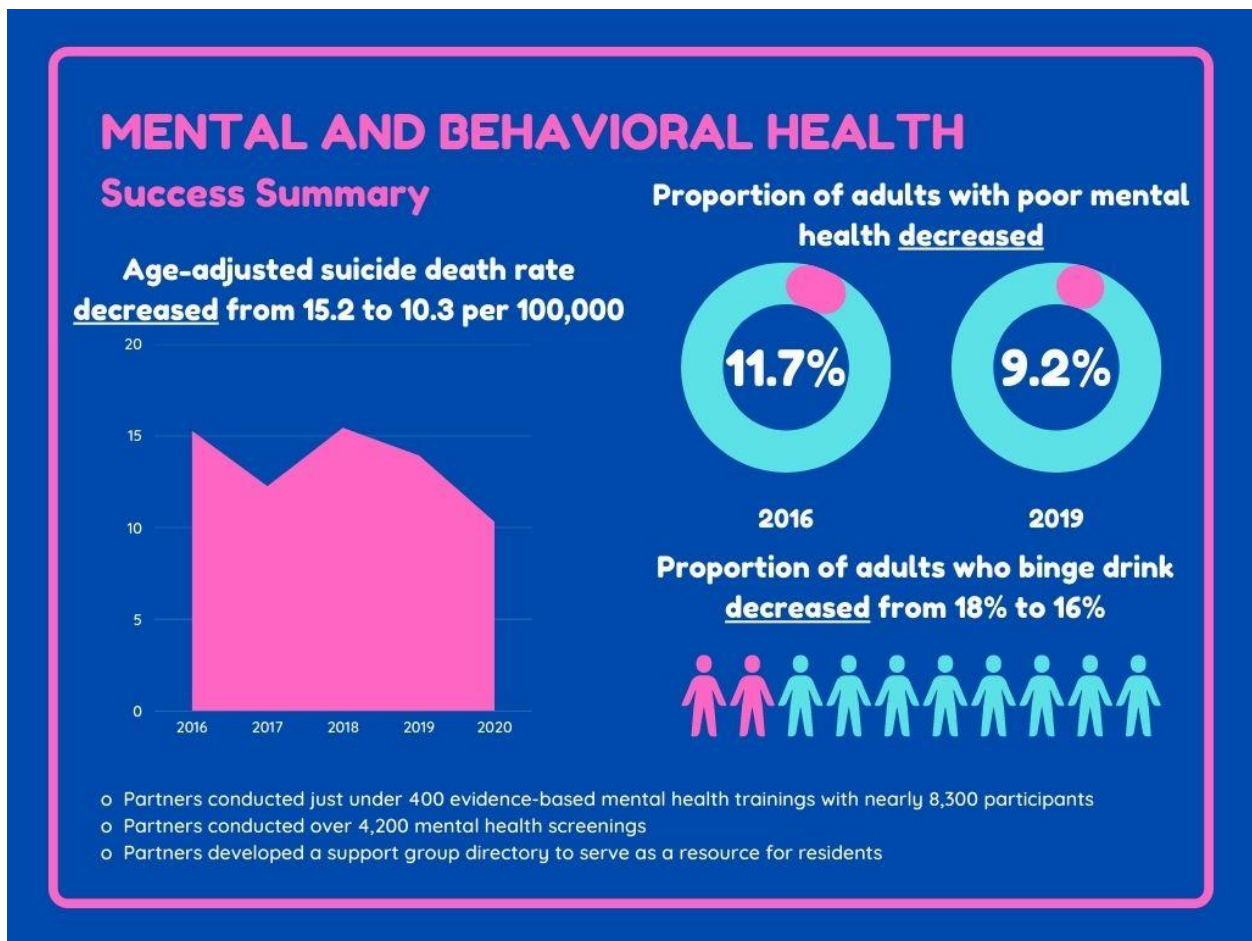

Figure 2: Palm Beach County CHIP 2017-2022: Active Living and Health Lifestyles Success Summary

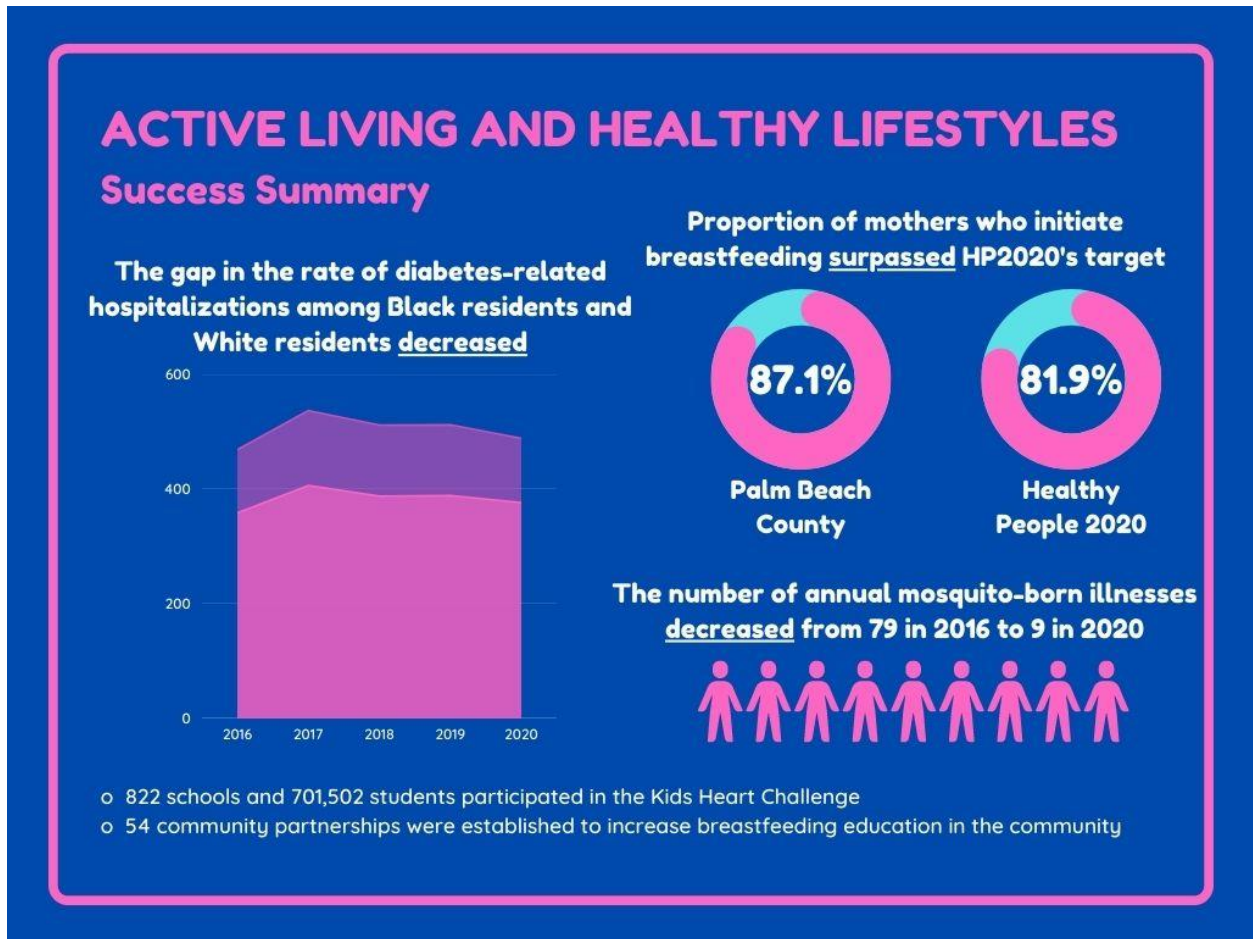

Figure 3: Palm Beach County CHIP 2017-2022: Access to Care and Services Success Summary

## **ASSESSMENT PHASE: PALM BEACH COUNTY COMMUNITY HEALTH ASSESSMENT SNAPSHOT**

The Palm Beach County Community Health Advisory Council frequently referenced the 2022 Community Health Assessment (CHA) findings to inform –the 2022 – 2027 CHIP development. The following section highlights the key areas of the 2022 Palm Beach County Community Health Assessment, including the county’s Demographic and Socioeconomic Profile, Health Status Profile, Health Resource Availability and Access Profile, Community Perspective Profile, and the Local Public Health System Assessment Profile. While the following section depicts key CHA highlights, additional indicators and relevant information for these components can be found in the [2022 Palm Beach County Community Health Assessment](#).

## CHA Snapshot: Demographic and Socioeconomic Profile

### CHA Demographic Data Highlights

As of 2019, nearly three quarters of all residents in Palm Beach County were White, 18.7% were Black or African American, and 2.7% were Asian. From 2015 to 2019, there was consistency in the racial demographic trends in Palm Beach County; however, there was a slight gradual decrease in the proportion of White residents and a slight gradual increase in the proportion of other races.

Figure 4: CHA Demographic Data Highlights – Race

Race Palm Beach County 2015 - 2019 (CHA Pages 40-41)	2015	2016	2017	2018	2019
White	75.0%	74.5%	74.2%	74.0%	73.5%
Black or African American	18.0%	18.3%	18.5%	18.6%	18.7%
American Indian or Alaskan Native	0.2%	0.1%	0.2%	0.2%	0.2%
Asian	2.5%	2.5%	2.6%	2.7%	2.7%

## CHA Socioeconomic Data Highlights

- Higher proportions of Palm Beach County Black or African American and Hispanic or Latino residents were living below the poverty level compared to their White and non-Hispanic counterparts, the county, and the state.
- A smaller percentage of Black or African American and Hispanic or Latino residents attained a high school diploma or further education compared to their White and non-Hispanic counterparts.
- Palm Beach County has less renter-occupied units compared to the state.

Figure 8: CHA Socioeconomic Data Highlights

Indicator (2019)	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black or African American	PBC White	PBC Hispanic or Latino Origin	PBC Non-Hispanic
<b>Below Poverty Level (%)</b> (CHA Pages 66-68)	14.0%	12.2%	<b>19.4%</b>	10.1%	<b>17.6%</b>	7.7%

## CHA Snapshot: Health Status Profile

### CHA COVID-19 Data Highlights

- As of January 1, 2022, Palm Beach County had a higher COVID-19 daily new case rate than the state of Florida overall.
- Significant disparities in the COVID-19 age-adjusted death rate existed among Palm Beach County Black residents and Hispanic residents, compared to their White and non-Hispanic counterparts.

Figure 9: CHA COVID-19 Data Highlights

Indicator	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black	PBC White	PBC Hispanic	PBC Non-Hispanic
<b>Daily New Cases (Rate Per 100,000) (1/1/2022)</b> (CHA Pages 124-125)	217.3	242.6	-	-	-	-
<b>Age-Adjusted Deaths (Rate Per 100,000) (2020)</b> (CHA Pages 126-128)	57.4	56.7	<b>123.2</b>	48.4	<b>99.2</b>	49.3

## CHA Maternal Health Data Highlights

- Lower proportions of Black and Hispanic Palm Beach County residents received adequate prenatal care compared to White and non-Hispanic residents.
- Black and Hispanic Palm Beach County residents reported a higher percentage of births to overweight mothers compared to White and non-Hispanic residents.
- Infant mortality was higher among Black and non-Hispanic residents, compared to their White and Hispanic counterparts.

Figure 10: CHA Maternal Health Data Highlights

Indicator (2020)	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black	PBC White	PBC Hispanic	PBC Non-Hispanic
<b>Births to Mothers with Adequate Prenatal Care (Proportion)</b> (CHA Page 138)	66.6	68.1	<b>66.4</b>	68.7	<b>60.4</b>	72.1

Source: Florida Health CHARTS, Florida Department of Health, Bureau of Vital Statistics, 2020

## CHA Morbidity Data Highlights

- Age-adjusted hospitalization rates of coronary heart disease, stroke, and diabetes were exponentially higher among Black Palm Beach County residents compared to White residents.
- Palm Beach County had lower rates of preventable hospitalizations for residents under the age of 65 from all conditions compared to the state.

Figure 11: CHA Morbidity Data Highlights

Indicator (Rate Per 100,000)	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black	PBC White	PBC Hispanic	PBC Non-Hispanic
<b>Coronary Heart Disease Age-Adjusted Hospitalization Rate (2019)</b> (CHA Pages 214-217)	274.1	215.6	<b>230.3</b>	190.4	192.1	<b>215.8</b>
<b>Cancer Age-Adjusted Incidence Rate (2018)</b> (CHA Pages 225-227)	454.3	404.4	326.4	<b>405.2</b>	263.9	<b>430.4</b>

### CHA Mortality Data Highlights

- Age-adjusted death rates from coronary heart disease, stroke, cancer, and HIV/AIDS were highest among Black and non-Hispanic Palm Beach County residents.
- Unintentional injury death rates were highest among White and non-Hispanic Palm Beach County residents.

Figure 12: CHA Mortality Data Highlights

Age-Adjusted Deaths (Rate Per 100,000) (2020)	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black	PBC White	PBC Hispanic	PBC Non-Hispanic
<b>Coronary Heart Disease</b> (CHA Pages 315-316)	90.6	93.3	<b>109.1</b>	91.1	79.8	<b>94.3</b>
<b>Stroke</b> (CHA Pages 318-320)	44.4	40.6	<b>62.0</b>	37.8	40.3	<b>40.9</b>

## CHA Mental and Behavioral Health Data Highlights

- Palm Beach County exceeded the overall state rates of age-adjusted opioid deaths and age-adjusted drug poisoning deaths in 2020.
- Palm Beach County White and non-Hispanic populations reported the highest rates of age-adjusted suicide deaths and age-adjusted drug poisonings, compared to their Black and Hispanic or Latino counterparts.

Figure 13: CHA Mental and Behavioral Health Data Highlights

Indicator	Location		Race		Ethnicity	
	Florida	Palm Beach County	PBC Black	PBC White	PBC Hispanic or Latino Origin	PBC Non-Hispanic
<b>Adults who had Poor Mental Health on &gt; 14 of the Past 30 Days (%) (2019)</b> (CHA Pages 178-179)	13.8%	9.2%	9.6%	10.7%	5.7%	-
<b>Age-Adjusted Suicide Deaths (Rate Per 100,000) (2019)</b> (CHA Page 181)	14.5	13.9	6.2	<b>16.1</b>	7.2	<b>15.5</b>

## CHA Key Informant Interview Highlights

Fifteen Key Informant Interviews were conducted with key community stakeholders and members. The individuals selected for the interviews included leaders, representatives, or members of medically underserved, low-income residents and communities of color. Participants also included public health funders, members of local law enforcement, and leaders of community-based and non-profit organizations.

## CHA Snapshot: Local Public Health System Assessment (LPHSA)

The Local Public Health System Assessment is a tool that is used to determine how well the local public health system addresses the components of the 10 Essential Public Health Services and accompanying Model Standards, answering questions such as “*What are the components, activities, competencies, and capacities of our public health system?*” and “*How well are the 10 Essential Public Health Services being provided in our system?*” In addition to the standard Local Public Health System Assessment Performance Score Assessment, a Local Health Department (LHD) Contribution Questionnaire and a Priority of Model Standards Questionnaire were completed for Palm Beach County in January 2022. These additional questionnaires served as supplementary indicators of the local public health system’s performance in each Essential Service area and provided deeper analysis of the local public health system in Palm Beach County. As depicted in the table below, the average overall performance score was 78.3 and the average overall priority rating was 8.9. The average overall agency (local health department) contribution score was 88.5 among all assessed Essential Service areas.

Figure 20: Palm Beach County Local Public Health Assessment Results

Model Standards by Essential Services	Performance Scores	Priority Rating	Agency Contribution Scores
ES 1: Monitor Health Status	97.2	9.0	100.0
ES 2: Diagnose and Investigate	97.9	9.3	91.7
ES 3: Educate/Empower	61.1	9.0	100.0
ES 4: Mobilize Partnerships	64.6	9.0	100.0
ES 5: Develop Policies/Plans	100.0	9.0	100.0
ES 6: Enforce Laws	94.4	8.7	75.0
ES 7: Link to Health Services	59.4	9.5	87.5
ES 8: Assure Workforce	61.3	9.0	81.3
ES 9: Evaluate Services	62.1	9.0	75.0
ES 10: Research/Innovations	85.4	7.7	75.0
<b>Average Overall Score</b>	<b>78.3</b>	<b>8.9</b>	<b>88.5</b>
<b>Median Score</b>	<b>75.0</b>	<b>9.0</b>	<b>89.6</b>

## **PLANNING PHASE: COMMUNITY HEALTH IMPROVEMENT PLAN DEVELOPMENT**

Thoughtful and strategic planning is a vital component of the Community Health Improvement Plan (CHIP) development process. The following section highlights the purpose of the CHIP, the methods used to develop the CHIP, the Community Health Improvement Model Framework used, and how the CHIP should be used throughout the community.

### **Purpose**

The Palm Beach County CHIP is a five-year systematic plan to address health issues based on the results of the Palm Beach County Community Health Assessment (CHA). The CHIP was developed by a variety of community partners, stakeholders, and advocates within the local public health system who will continue the work of implementing, monitoring, and evaluating the goals, objectives, strategies, and activities outlined in the plan for each priority area. Community collaboration is a vital component of effectively executing the plan and driving community change within the priority areas. This plan will coordinate and target resources to address the identified health priorities throughout the local public health system and the county at large. As a “living” document, the Advisory Council will update and revise the CHIP to continue to meet the needs of the community.

### **Methods**

The CHIP focuses on the top three priorities that were determined by the Advisory Council based on the data available in the CHA, prioritization activities, and insights from the community, stakeholders, and partnering agencies. There were several other health indicators that emerged throughout this process, and though they are not addressed in this plan, they remain critical and should be considered for future health planning activities in Palm Beach County. In addition to the three selected priority areas, the Palm Beach County Community Health Advisory Council emphasized the importance of addressing health equity throughout the CHIP. Overall, the Palm Beach County CHIP was designed to complement and build upon current county efforts, resources, plans, and initiatives already in place to improve the health of Palm Beach County. To the extent possible, Advisory Council members strategically identified partners and resources to leverage and enhance potential impact and ensure no duplication or conflict in recommendations or actions occur between the plan and current community efforts.

### **Community Health Improvement Model Framework**

The Florida Department of Health in Palm Beach County, Health Care District of Palm Beach County, Health Council of Southeast Florida, and the Palm Beach County Community Health Advisory Council collaborated from October 2021 to June 2022 to conduct a thorough CHA and develop a comprehensive, data-driven CHIP. The Advisory Council worked to ensure adequate representation and consideration of health equity principles and the social determinants of health at each stage. The following section outlines this process.

## Developing Partnerships

Beginning in Fall 2021, the Florida Department of Health in Palm Beach County and the Health Care District of Palm Beach County engaged the Health Council of Southeast Florida (HCSEF) to inform and facilitate the countywide CHA and CHIP processes. The previously established Palm Beach County Community Health Advisory Council was engaged to provide diverse representation of the local public health system and residents, and steer the community health improvement process. Throughout the subsequent process, contacts were updated and added to the Advisory Council regularly to ensure broad representation and engagement. The Advisory Council is comprised of diverse, multi-sector and multi-disciplinary partners who are representative of the communities they serve and are active contributors to the local public health system in Palm Beach County.

## Problem Identification and Prioritization

From October 2021 to January 2022, HCSEF began collecting and analyzing secondary quantitative data and primary qualitative data. HCSEF compiled and analyzed secondary quantitative data from trusted sources, such as Florida Health CHARTS, the Florida Department of Health Bureau of Vital Statistics, and the U.S. Census Bureau, to paint the picture of health and living conditions in Palm Beach County. HCSEF also disaggregated key demographic and socioeconomic data, health status data, and health resource availability and access data by Census County Division (CCD), ZIP Code, race, and ethnicity when possible to highlight disparities.

Primary qualitative data was collected through seventeen resident focus groups, fifteen key informant interviews, and the National Public Health Performance Standards (NPHPS) Local Public Health System Assessment (LPHSA) process, which included the supplementary Local Health Department (LHD) Contribution Questionnaire and the Priority of Model Standards questionnaire. The Local Public Health System Assessment (LPHSA) took place in January 2022 over the course of two meetings. The first meeting was the internal LPHSA, which was attended by Florida Department of Health in Palm Beach County and Health Care District of Palm Beach County staff members. At the next meeting, various community leaders and stakeholders convened to complete the second and final portion of the LPHSA.

The Palm Beach County Community Health Advisory Council convened in January 2022 to prepare for the new CHIP cycle, reviewing the CHA and CHIP framework, timeline, and best practices. The CHA was finalized in January 2022 and, in February 2022, the group convened for to review the CHA findings.

In March 2022, the Advisory Council met to begin the 2022 – 2027 CHIP development process. After reviewing the CHA findings and participating in a thorough group discussion, the Advisory Council formally voted on three CHIP priority areas through a multi-voting technique. HCSEF provided members with information related to the CHA key findings, Healthy People 2030, and the Florida State Health Improvement Plan prior to the meeting to provide additional information to inform decision making. While a number of priorities were discussed, the group ultimately voted to focus on the following strategic health priorities:

- **Chronic Disease Prevention and Self-Management**
- **Mental and Behavioral Health**
- **Access and Linkage to Health and Human Services**

Notably, members considered health equity as a priority area, but ultimately decided to incorporate health equity as a cross-cutting theme throughout the CHIP to ensure that efforts in all areas contributed towards

creating a more equitable Palm Beach County. HCSEF also called on members to become ambassadors of the 2022 Palm Beach County CHA during the month of March 2022. To do so, HCSEF developed and shared a condensed data presentation with the Advisory Council to disseminate the CHA findings widely with professional networks and community members throughout the county in an effort to increase community awareness and engagement, and glean additional perspectives.

### Developing Goals, Objectives, Strategies, Activities, Action Steps, and Key Partners

In April 2022, the Advisory Council convened to review key data from the CHA related to the selected priority areas, conduct a root cause analysis, and draft goals. The Advisory Council used the root cause analysis findings to develop goals, objectives, and strategies that address the specific conditions that lead to the prioritized health issues. To conduct the root cause analysis, the Advisory Council broke into three groups and rotated between breakout rooms, completing the 5 Why's activity for each priority area, so that each member had the opportunity to provide input on all three priorities. HCSEF crafted the proposed goals based on these discussions, bringing them to the Advisory Council for a formal vote of approval during the next meeting. At that time, Advisory Council members provided input and refined the goals.

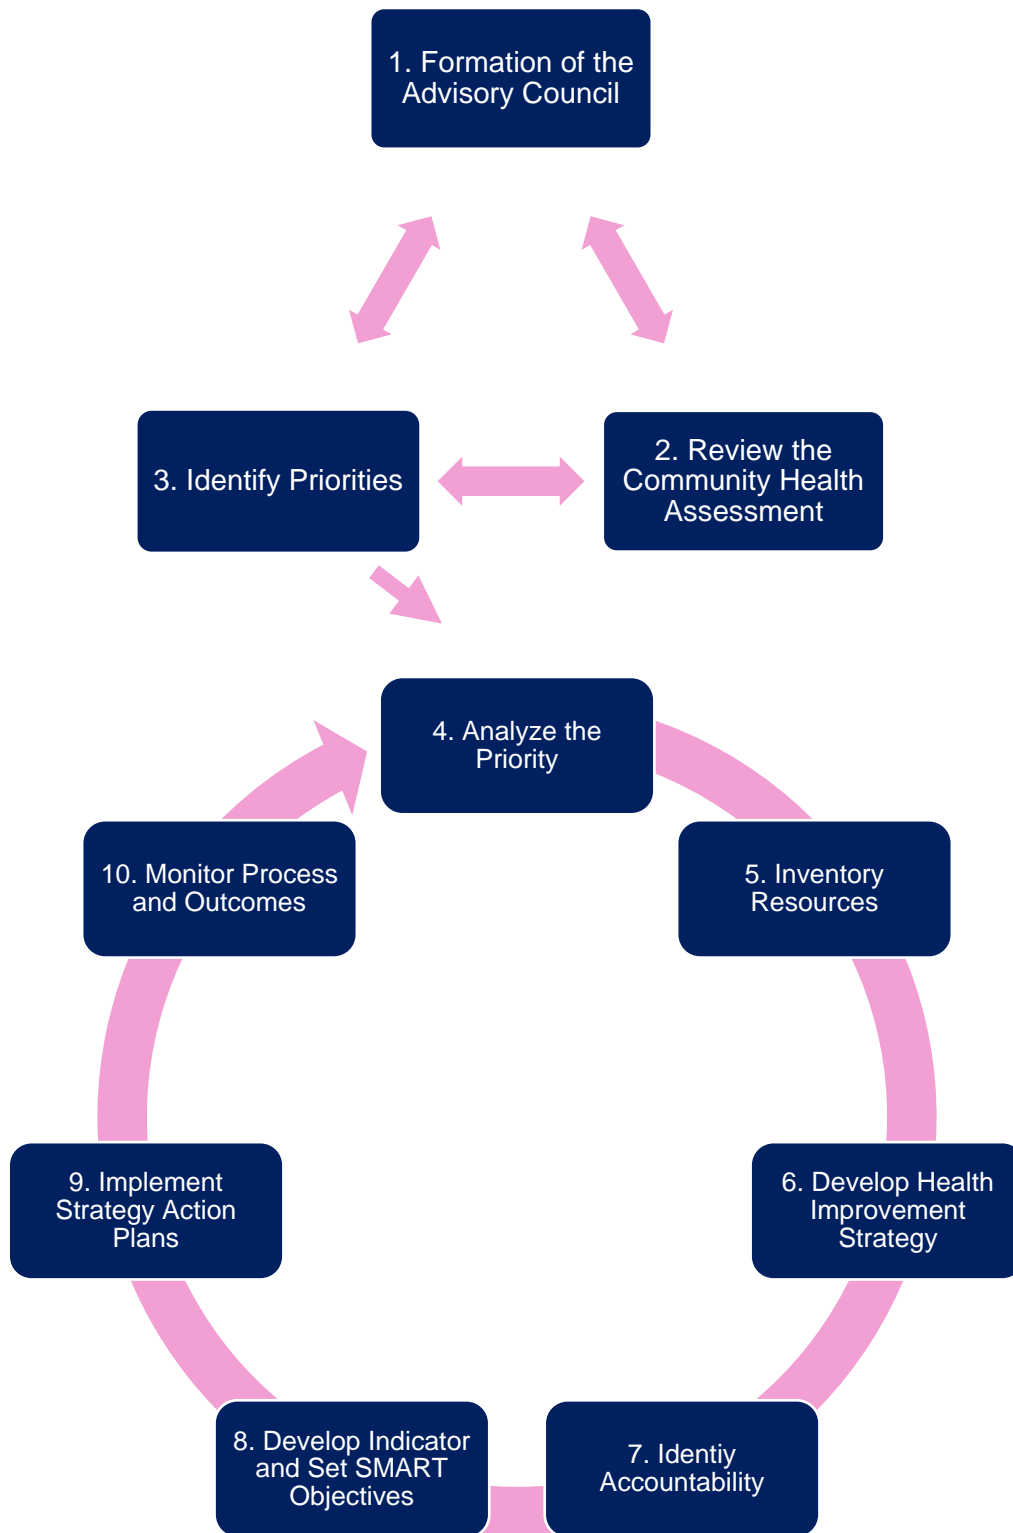

In May 2022, HCSEF compiled notes from all previous Advisory Council meetings, CHA data, and notes from the root cause analysis activity to finalize the goals and draft associated S.M.A.R.T. (Specific, Measurable, Attainable, Relevant/Realistic, Time-bound) objectives for each goal. HCSEF researched Healthy People 2030 and Florida State Health Improvement Plan objectives to ensure alignment between national, state, and local efforts. After the goals and objectives were solidified, the Advisory Council worked together to brainstorm strategies, which HCSEF refined based on the group discussion and presented at the following meeting. To the extent possible, the Advisory Council adopted evidence-based strategies into the workplan to ensure that efforts will be effective.

In early June 2022, the Advisory Council convened again to determine key partners, activities, and action steps for each strategy. This final Advisory Council meeting served to complete the CHIP workplans. Advisory Council members utilized current efforts, public health trends, and community knowledge to inform and enhance the plan throughout this process.

### Action Cycle

The Palm Beach County Community Health Advisory Council will implement the CHIP and monitor the outcomes and activities beginning in July 2022. The Advisory Council will carry out these efforts throughout the CHIP's five-year term, from July 2022 to June 2027. The Advisory Council will meet on a bi-annual basis to monitor activities, evaluate outcomes, and update the plan to increase effectiveness as needed.

Figure 21: Community Health Improvement Framework

Adapted from Institute of Medicine's Community Health Improvement Plan Process

## Community Health Assessment (CHA) and Community Health Improvement Plan (CHIP) Timeline

### Fall 2021

- **November 2021:** Secondary Quantitative Data Analysis is conducted to depict the demographic and socioeconomic profile of the county, the health status profile, and health resource availability and access in the county.
- **November 2021 - January 2022:** Primary Qualitative Data Collection and Analysis is conducted through 17 resident focus groups facilitated in English, Spanish, and Haitian Creole and 15 Key Informant Interviews are conducted with key community stakeholders and community members

### Winter 2021

- **January 2022:** A Local Public Health System Assessment is conducted, including the Local Health Department Contribution Questionnaire and the Priority of Model Standards Questionnaire.
- **January 2022:** The 2022 Palm Beach County Community Health Assessment is published.
- **January 2022:** First Palm Beach County Community Health Advisory Council Meeting is held to review 2017-2022 CHIP progress and review the CHA data.
- **February 2022:** Second Palm Beach County Community Health Advisory Council meeting is held to vet the 2022 CHA data.

### Spring 2022

- **March 2022:** Palm Beach County Community Health Advisory Council members are called upon to be "Ambassadors of the CHA." A condensed data presentation is distributed to partners so they can share the CHA findings widely with their networks.
- **March 2022:** Third Palm Beach County Community Health Advisory Council Meeting is held to select the 2022-2027 Palm Beach County CHIP Priority Areas through multi-voting. Prior to the meeting, participants are provided with a document that contains potential priority areas based on the CHA data, Healthy People 2030, and the Florida State Health Improvement Plan (SHIP).
- **April 2022:** Fourth Palm Beach County Community Health Advisory Committee Meeting is held to conduct a root cause analysis of each priority area and develop the goals for each priority area.
- **May 2022:** Fifth Palm Beach County Community Health Advisory Committee Meeting is held to develop the CHIP objectives and strategies.

### Summer 2022

- **June 2022:** Sixth Palm Beach County Community Health Advisory Committee Meeting is held to determine the CHIP key activities, action steps, and responsible partners. The CHIP workplan is finalized.
- **July 2022:** The 2022-2027 Palm Beach County Community Health Improvement Plan enters the Implementation Phase. Implementation will take place between July 2022 and June 2027.

## ACTION PHASE: STRATEGIC HEALTH PRIORITY AND ACTION PLANS

The Palm Beach County Community Health Improvement Plan (CHIP) is a five-year systematic plan to address health priorities identified based on the Community Health Assessment (CHA) findings. The plan focuses on the top three priorities identified by the Advisory Council and defines specific goals, strategies, objectives, activities and measures related to each priority.

This section of the report presents the culmination of the perspective, input, and effort of community members and stakeholders in this improvement planning process. Further, it includes each of the three priority area goals, objectives, strategies, action steps, and evaluation methods.

A **goal** is a broad, general statement about a desired outcome. It represents the destination the community hopes to reach within each priority area.

The **objectives** are more specific and detail what the community hopes to achieve and by when. Whenever feasible, this plan's objectives are S.M.A.R.T., meaning they are specific, measurable, achievable, relevant/realistic, and time-bound. Each of the objectives are **aligned with national and/or state priorities**, such as those found in Healthy People 2030 and the Florida State Health Improvement Plan.

The **strategies** detailed in the plan are the ways in which the Advisory Council will achieve the objectives. Examples of **evidence-based interventions and programs** are outlined for each priority area to guide how the detailed CHIP strategies are modeled. The **action steps** in each strategy provide more detail on how the strategies will be implemented.

The strategies in the CHIP aim to:

- Address the structural issues and root causes of the identified health priorities
- Address health disparities through the application of a health equity lens
- Utilize data to measure disparities and to monitor the impact of interventions
- Outline approaches that are relevant and realistic given the available time, resources, and competing priorities
- Devise an action plan that can have a wide-reaching community-wide impact
- Detail measurable objectives to evaluate progress
- Engage a broad range of community stakeholders
- Support ongoing and existing efforts in the community, leveraging partnerships and increasing collaboration
- Implement evidence-based interventions and models for community health improvement
- Include interventions that encourage healthy behavior changes, while also addressing structural and systemic barriers
- Focus on improving conditions and health outcomes in the community

While the Palm Beach County Community Health Advisory Council will collaborate and leverage existing community resources to implement the CHIP, **key partners** are listed in the action plan for each activity. These key partners were identified by the group to have relevant experience and expertise related to the priority area activities. Serving as lead agencies, these key partners will oversee implementation efforts for each of the strategies within each priority area and report progress during the Palm Beach County Community Health Advisory Council meetings. As additional partners are identified throughout the CHIP

implementation process, updates will be made to these areas of the plan to comprehensively depict community efforts.

The information in this plan aims to lay the foundation and provide direction for the community health improvement planning efforts in Palm Beach County over the course of five years. Ongoing evaluation of specific goals, activities, and outcomes will ensure that the Advisory Council is making a meaningful impact with CHIP efforts. As this ongoing monitoring and evaluation is conducted, it is important to note that this CHIP is a “living” document and can be adapted throughout the action cycle to continuously meet the community's evolving needs. Evaluation throughout the course of this plan will also help guide future planning activities in Palm Beach County, as the success of strategies and activities will be assessed regularly.

## How to Use The CHIP

The implementation of the CHIP aims to strengthen the public health infrastructure, aid and guide countywide planning, foster collaboration and capacity-building and, ultimately, promote the well-being and quality of life for Palm Beach County residents. Because health improvement occurs at all levels of the community, including in homes, schools, workplaces, and faith-based spaces, the CHIP provides goals and actions that the community-at-large can work together to achieve. The Palm Beach County CHIP, created by community stakeholders and driven by resident input, broadens and builds upon successful local initiatives taking place in our community. We encourage community partners to review the priorities and goals, reflect on the suggested strategies, and consider how to participate in the CHIP process or specific priority area subcommittees to help improve the health of Palm Beach County. Below are some suggested strategies you may consider to play a role in achieving a healthier community.

- Promote the CHIP health priorities in the community
- Support programs, policies, initiatives and campaigns aimed at addressing the health priorities
- Be an advocate in the community for healthy behaviors, policies, systems, and environments
- Lead by example and practice healthy behaviors in your home, workplace, and social circles
- Share your resources whether it be time, support, funding, or expertise to strengthen health improvement efforts

## Priority Area: Chronic Disease Prevention and Self-Management

### Chronic Disease Prevention and Self-Management – Why Address It?

Chronic diseases are conditions that last at least one year and require ongoing medical attention and/or limit daily activities. According to the Centers for Disease Control and Prevention (CDC), approximately six in ten adults in the United States (US) have a chronic disease, and four in ten US adults have two or more chronic diseases.<sup>3</sup> Major chronic diseases include heart disease and stroke, cancer, and diabetes, among others. Chronic disease greatly reduces the health-related quality of life of those impacted, which often results in comorbidity, adverse health behaviors, depression, insomnia, lower life expectancy, and cognitive challenges. The primary risk factors and underlying causes of chronic disease include, but are not limited to, tobacco use and exposure to secondhand smoke, poor nutrition, physical inactivity, and excessive alcohol use, but also key social determinants of health, such as economic stability and the neighborhood and built environment.<sup>4</sup> Many of these conditions can be prevented or mitigated through access to healthy foods, access to proper care and treatment, and behavior and lifestyle changes.

In Palm Beach County in 2020, three of the top five leading causes of death were chronic diseases: heart disease, cancer, and stroke.<sup>5</sup> Available vital statistic and hospitalization data demonstrated stark racial and ethnic chronic disease-related disparities, as age-adjusted hospitalization and death rates attributed to chronic disease were exponentially higher among Black Palm Beach County residents compared to White residents. For instance, in 2019, both the age-adjusted hospitalization and death rate attributed to coronary heart disease were approximately 1.2 times higher among Black residents, compared to their White counterparts. Moreover, Black residents experienced an age-adjusted diabetes hospitalization rate that was 2.6 times higher than the rate among White residents, while Hispanic residents experienced a rate 1.02 times higher than their non-Hispanic counterparts. Lastly, the age-adjusted stroke hospitalization rate was 2.2 times higher and the age-adjusted stroke death rate was 1.6 times higher among Black residents, compared to White residents.<sup>6 7</sup>

These stark differences depict major chronic disease disparities in our community. As such, this data reveals a need to implement upstream approaches to improve chronic disease prevention and self-management in Palm Beach County. The following table shows the goals, objectives, strategies, and activities that will provide direction for the community health improvement planning efforts for this priority area. The Plan also includes best practices, evidence-supported initiatives, and current community resources specific to this priority area.

Figure 22: Chronic Disease Prevention and Self-Management Priority Area Goals, Strategies, Objectives, and Activities

Priority Area: Chronic Disease Prevention and Self-Management			
Goal 1: Support healthy lifestyles through promotion of nutrition, physical activity, and disease prevention.			
Strategy: Engage and promote community-based systems that support healthy eating.			
<p>Food insecurity disproportionately affects low-income families. Food insecurity is associated with the consumption of highly processed foods with low nutritional value, which contributes to the prevalence of obesity and other chronic diseases.</p> <p><b>Objective:</b> Reduce the proportion of residents who experience food insecurity from 10.6% in 2019 to 6.6% in 2027.</p>			<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> CD6.1, SEC3.3  <b>Healthy People 2030:</b> NWS-01, AH-04, AH-R03</p>
Activities	Key action steps	Measures	Key partners
Increase access to affordable, healthy fruits and vegetables	Promote the Palm Beach County/United Way Hunger Relief Plan to connect the community and residents with food resources	# initiatives	<ul style="list-style-type: none"> <li>School District of Palm Beach County</li> <li>Florida Department of Health in Palm Beach County</li> <li>United Way of Palm Beach County/Hunger Relief Plan</li> <li>Palm Beach County and Palm Beach County Commission</li> <li>Florida Department of Agriculture and Community Services</li> </ul>
	Promote the UF/IFAS Extension Program resources and services	# residents learning about services	<ul style="list-style-type: none"> <li>UF/IFAS Extension Program</li> </ul>
	Promote the school district expanded food programs by identifying and meeting the schools' needs for existing weekend backpack and pantry programs, High School reengineering initiatives, middle and elementary school Re-Think Campaigns, food pantries, and Community Eligibility Provisions (CEP)	# of sites served by Palm Beach County School Food Services Department for High School Reengineering initiative and the Re-Think Campaign for middle and elementary schools	<ul style="list-style-type: none"> <li>United Way of Palm Beach County/Hunger Relief Plan</li> <li>School District of Palm Beach County</li> </ul>

Activities	Key action steps	Measures	Key partners
Increase access to affordable, healthy fruits and vegetables	Identify areas of need and funding opportunities to increase senior home-delivery meals/Congregate meals through the use of volunteers	# meals serviced to seniors (age 60+) in a congregate setting  # senior citizens participating in congregate meals/soup kitchens  # of unduplicated senior citizens participating in home delivered meals/Meals on Wheels  # home-delivered/Meals on Wheels meals  # unduplicated senior hunger volunteers	<ul style="list-style-type: none"> <li>• Area Agency on Aging</li> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> </ul>
	Monitor food bank progress with kitchen expansion and food processing facilities and ability to deliver meals to seniors (year-round) and students (summer and after school)	# kitchens expanded and food processing facilities  # of meals delivered	<ul style="list-style-type: none"> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> <li>• Palm Beach County Food Bank</li> </ul>
	Consider opportunities to partner with ride-share service providers to deliver meals	# agencies offering and implementing a pantry grocery delivery program	<ul style="list-style-type: none"> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> </ul>

Activities	Key action steps	Measures	Key partners
Increase access to affordable, healthy fruits and vegetables	Promote food access programs to increase the number of facilities participating in food access programs and farmer's markets and outlets that accept SNAP (SNAP, WIC, childcare food programs) by distributing user-friendly guides, identifying barriers to participation in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) and conducting relevant outreach, and by conducting targeted SNAP outreach efforts	<p># user-friendly guides shared with partners to distribute to residents for navigating SNAP/EBT and Fresh Access Bucks Programs (Fresh Access Bucks Program, American Heart Association, Florida Impact, and United Way)</p> <p># SNAP retailers and farmer's markets that accept SNAP and Fresh Access Bucks (FAB)</p> <p># WIC outreach events and efforts</p>	<ul style="list-style-type: none"> <li>• Florida Department of Health in Palm Beach County</li> <li>• Women, Infant, and Children (WIC) Program</li> <li>• Fresh Access Bucks Program</li> <li>• American Heart Association</li> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> </ul>
	Promote federal meal programs that serve at risk communities in their communities and neighborhoods	<p># sites participating in CCFP and After-School Meal Program</p> <p># meals served in the Mobile Summer BreakSpot Program and Summer BreakSpot</p>	<ul style="list-style-type: none"> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> <li>• Palm Beach County and the Palm Beach County Commission</li> <li>• Florida Department of Health in Palm Beach County</li> </ul>
	Support local food pantries through the implementation of healthy procurement/donation <b>policies</b> .	# policies implemented	<ul style="list-style-type: none"> <li>• American Heart Association</li> <li>• United Way of Palm Beach County/Hunger Relief Plan</li> </ul>

<b>Strategy: Increase community-based activities, such as Let's Move, to increase options for physical activity in the community.</b>			
Increasing the proportion of residents who are physically active will reduce the risk for obesity, chronic disease, and other poor health outcomes.		<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> CD6.2 <b>Healthy People 2030:</b> PA-01, PA-05, PA-06, PA-09	
<b>Objective:</b> Reduce the proportion of adults who are sedentary from 25.6% in 2019 to 24.4% in 2027 (among Black residents: 31.4% in 2019 to 25% in 2027; among Hispanic residents: 28.6% in 2019 to 24% in 2027).			
<b>Objective:</b> Increase the proportion of students who were physically active for at least 60 minutes on all 7 of the past 7 days (middle and high school students) from 18.1% in 2020 to 19.5% in 2027 (among Black students: from 14.4% in 2020 to 16.5%; among Hispanic students: from 16% to 17.5%).			
<b>Activities</b>	<b>Key action steps</b>	<b>Measures</b>	<b>Key partners</b>
Expand existing community campaigns promoting activity and exercise using programs such as Let's Move	Increase Let's Move activities from one month of activities (March) to a 12-month campaign	# participants	<ul style="list-style-type: none"> <li>Digital VibeZ</li> <li>Palm Health Foundation</li> <li>Florida Department of Health in Palm Beach County</li> </ul>
Promote exercise programs, especially for those who have arthritis or are at-risk for falls	Promote the YMCA exercise program	# participants	<ul style="list-style-type: none"> <li>YMCA of South Palm Beach County</li> <li>Area Agency on Aging</li> <li>Florida Department of Health in Palm Beach County</li> <li>Ruth and Norman Rales Jewish Family Services</li> </ul>
	Increase partnerships to implement programs at different sites and locations	# participants with arthritis or at risk for falls # sites and locations	
	Promote the Area Agency on Aging Tai Chi Moving for Better Balance and Tai Chi for Arthritis programs	# participants	
	Promote the Silver Sneakers exercise program for older adults	# participants	
	Identify and train additional volunteers to implement programs in the community	# participants	
Promote the American Heart Association Kids Heart Challenge to engage students in physical activity and educate students about keeping their hearts and brains healthy and helping others	Increase participation in the challenge among elementary, middle, and high school youth	# schools participating in the challenge # students registered online # students who were instructed in CPR/ Warning Signs of Stroke	<ul style="list-style-type: none"> <li>American Heart Association</li> <li>School District of Palm Beach County</li> </ul>

<b>Strategy: Promote awareness of low-to-no cost services.</b>			
<b>Objective:</b> Increase the proportion of Palm Beach County adults with a personal doctor from 75.6% in 2019 to 80% in 2027 (Among Non-Hispanic Black adults: from 72.7% in 2019 to 78% in 2027; among Hispanic adults: from 61.3% in 2019 to 73% in 2027).			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> CD3.1 <b>Healthy People 2030:</b> AHS-07, AHS-9, AH-01
<b>Activities</b>	<b>Key action steps</b>	<b>Measures</b>	<b>Key partners</b>
Create a social marketing campaign to promote awareness that “every resident has access to a medical home.” Including information sharing related to low-to-no cost services	Share educational materials related to low-to-no cost services	# materials shared # residents reached # events attended	<ul style="list-style-type: none"> <li>Federally Qualified Health Centers</li> <li>Florida Department of Health in Palm Beach County</li> <li>American Heart Association</li> <li>Palm Beach County Medical Society (Project Access)</li> <li>Caridad Center</li> <li>Palm Beach Civic Association Health Committee</li> <li>Pediatric Care Providers, such as Palm Beach Pediatrics, Pediatric Partners, and the Pediatric Society of Palm Beach County</li> <li>Florida Department of Health in Palm Beach County</li> </ul>
	Conduct seminars to improve medical-home education	# seminars # residents educated	
Conduct a campaign on metabolic syndrome, which includes encouraging people to seek primary care and attending visits	Encourage and educate residents on seeking and obtaining primary care	# materials shared # residents reached	
<b>Goal 2: Reduce the burden of chronic diseases by improving quality of life, minimizing symptoms, and preventing unnecessary hospitalizations.</b>			
<b>Strategy: Support community-based interventions to effectively prevent and manage chronic diseases, such as Chronic Disease Self-Management programs for residents.</b>			
<b>Strategy: Support system-level interventions to effectively prevent and manage chronic diseases, such as culturally adapted health care and Federally Qualified Health Center (FQHC) chronic disease management best practices.</b>			
If individuals living with chronic disease have access to the food, treatment, and self-management counseling they need, we will see a decrease in the rate of preventable hospitalizations from or associated with chronic diseases.			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> CD2.4, CD4.2 <b>Healthy People 2030:</b> 0A-05; HDS-09; HDS-02; HDS-03
<b>Objective:</b> Reduce hospitalizations from <u>diabetes</u> or with <u>diabetes</u> from 1,713 per 100,000 (2020) to 1,695.0 per 100,000 by 2027. (Black: 3,287.4 in 2020 to 3214.8 in 2027; Hispanic: 1,768.2 in 2020 to 1673.8 in 2027).			

<p><b>Objective:</b> Reduce age-adjusted <u>coronary heart disease</u> hospitalizations from 175.1 per 100,000 (2020) to 122.1 per 100,000 in 2027. (Black: 171.7 in 2020 to 139.6 in 2027; Hispanic: 146.4 in 2020 to 108.4 in 2027; NH: 176.9 in 2020 to 128.3 in 2027).</p> <p><b>Objective:</b> Reduce hospitalizations from <u>stroke</u> from 176.0 per 100,000 (2020) to 160.5 per 100,000 in 2027. (Black: 305.0 in 2020 to 227.5 in 2027; Hispanic: 121.2 in 2020 to 95.1 in 2027; NH: 181.5 in 2020 to 146.9 in 2027).</p>			
<p>If individuals living with chronic disease engage in chronic disease self-management, their quality of life and health outcomes will improve.</p> <p><b>Objective:</b> Increase the proportion of adults with diabetes who have ever had diabetes self-management education from 69.7% in 2019 to 76.4% in 2027.</p>		<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> CD 4.1  <b>Healthy People 2030:</b> D-06</p>	
Activities	Key action steps	Measures	Key partners
Provide Chronic Disease Self-Management programs for residents that include educational opportunities and guides/resources	Promote Chronic Disease Self-Management programs among residents living with chronic disease and family caregivers	# trained # trainings	<ul style="list-style-type: none"> <li>• Lake Okeechobee Rural Health Network</li> <li>• Diabetes Coalition of Palm Beach County</li> <li>• Area Agency on Aging</li> <li>• Area hospitals</li> <li>• Caridad Center</li> <li>• YMCA of South Palm Beach County</li> <li>• Florida Department of Health in Palm Beach County</li> <li>• Health Council of Southeast Florida</li> </ul>
Increase chronic disease screenings county-wide	Promote the Diabetes Coalition chronic disease screening, prevention and self-management education services among residents with chronic disease and family caregivers	# trained # trainings	<ul style="list-style-type: none"> <li>• Diabetes Coalition of Palm Beach County</li> <li>• Florida Department of Health in Palm Beach County</li> <li>• Area hospitals</li> <li>• Caridad Center</li> </ul>
Increase engagement with blood pressure self-monitoring program	Promote the blood pressure self-monitoring program	# programs conducted # residents engaged	<ul style="list-style-type: none"> <li>• YMCA of South Palm Beach County</li> <li>• Florida Department of Health in Palm Beach County</li> <li>• Area hospitals</li> <li>• Caridad Center</li> </ul>

Activities	Key action steps	Measures	Key partners
Increase trainers for Chronic Disease Prevention and Self-Management programs and other related programs	Conduct Train the Trainers for programs such as <ul style="list-style-type: none"> <li>Chronic Disease Self-Management and Prevention</li> <li>American Heart Association's Healthy for Life 20 by 20</li> </ul>	# trainers trained	<ul style="list-style-type: none"> <li>Area Agency on Aging</li> <li>American Heart Association</li> <li>Caridad Center</li> </ul>
Conduct culturally adapted health care training for providers	Provide culturally adapted health care trainings for providers to increase cultural competency and understanding	# trained	<ul style="list-style-type: none"> <li>Federally Qualified Health Centers/Free clinics</li> <li>Area hospitals</li> <li>Palm Beach County Medical Society</li> <li>Health Care District of Palm Beach County</li> <li>Florida Department of Health in Palm Beach County</li> <li>Caridad Center</li> <li>Florida Department of Health in Palm Beach County</li> </ul>
Engage providers, including Federally Qualified Health Centers and free clinics, to meet chronic disease management best practices	Provide education and information to providers related to chronic disease management best practices	# providers engaged	<ul style="list-style-type: none"> <li>Florida Department of Health in Palm Beach County</li> <li>American Heart Association</li> <li>Federally Qualified Health Centers</li> <li>Caridad Center</li> <li>Community Health Center of West Palm Beach</li> </ul>
	Promote and assist in implementing provider policy, system, and environment changes focused on ensuring chronic disease management best practices are followed	# clinical PSEs achieved	

## Priority Area 1: Chronic Disease Self-Management- Objectives and Activities Progress Tracking

The following sections of this report highlight progress toward achieving priority area objectives. Status indicators are as follows:

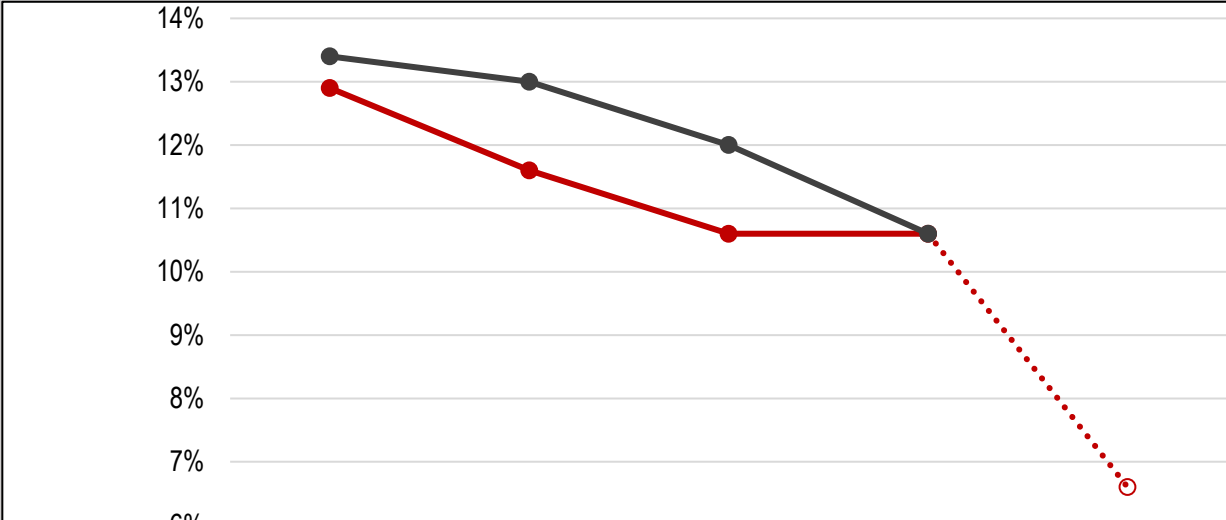

-  = Little to no movement towards objective target
-  = Some progress towards meeting the objective target
-  = Reached or surpassed objective target

## Goal 1: Support Healthy Lifestyles through the Promotion of Nutrition, Physical Activity, and Disease Prevention

### Strategy 1: Engage and Promote Community-Based Systems That Support Healthy Eating

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Chronic Disease Self-Management activities under the first strategy of Goal One. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 1: Priority Area 1 - Goal 1 - Strategy 1

<b>Goal</b>		Support healthy lifestyles through the promotion of nutrition, physical activity, and disease prevention.																					
<b>Strategy</b>		Engage and promote community-based systems that support healthy eating.																					
<p><b>Objective:</b> Reduce the proportion of residents who experience food insecurity from 10.6% in 2019 to 6.6% in 2027.</p> <p><b>Status Progress:</b> In Palm Beach County, 10.6% of the population experienced food insecurity in 2020, equal to the rate in Florida overall, and with no change from the baseline year.</p> 		 <table border="1"> <thead> <tr> <th></th> <th>2017</th> <th>2018</th> <th>Baseline: 2019</th> <th>2020</th> <th>Goal: 2027</th> </tr> </thead> <tbody> <tr> <td>—●— Palm Beach</td> <td>12.9%</td> <td>11.6%</td> <td>10.6%</td> <td>10.6%</td> <td>6.6%</td> </tr> <tr> <td>—●— Florida</td> <td>13.4%</td> <td>13.0%</td> <td>12.0%</td> <td>10.6%</td> <td></td> </tr> </tbody> </table>					2017	2018	Baseline: 2019	2020	Goal: 2027	—●— Palm Beach	12.9%	11.6%	10.6%	10.6%	6.6%	—●— Florida	13.4%	13.0%	12.0%	10.6%

Chronic Disease Self-Management Goal 1 Strategy 1	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Increase access to affordable and healthy foods (Cont'd)	Promote federal meal programs that serve at-risk communities in their communities and neighborhoods	283 sites participated in CCFP, and 214 sites participated in AMP  (Oct 1, 2021 - Sep 30, 2022)	<b>178 sites</b> participated in the Child Care Food Program (CCFP), and <b>189 sites</b> participated in the After-School Meal Program (AMP)	United Way of Palm Beach County/Hunger Relief Plan
		Support local food pantries through the implementation of healthy procurement/donation policies.	734,922 meals served	<b>796,566 meals served</b> in the Mobile Summer BreakSpot and Summer BreakSpot	American Heart Association (AHA)

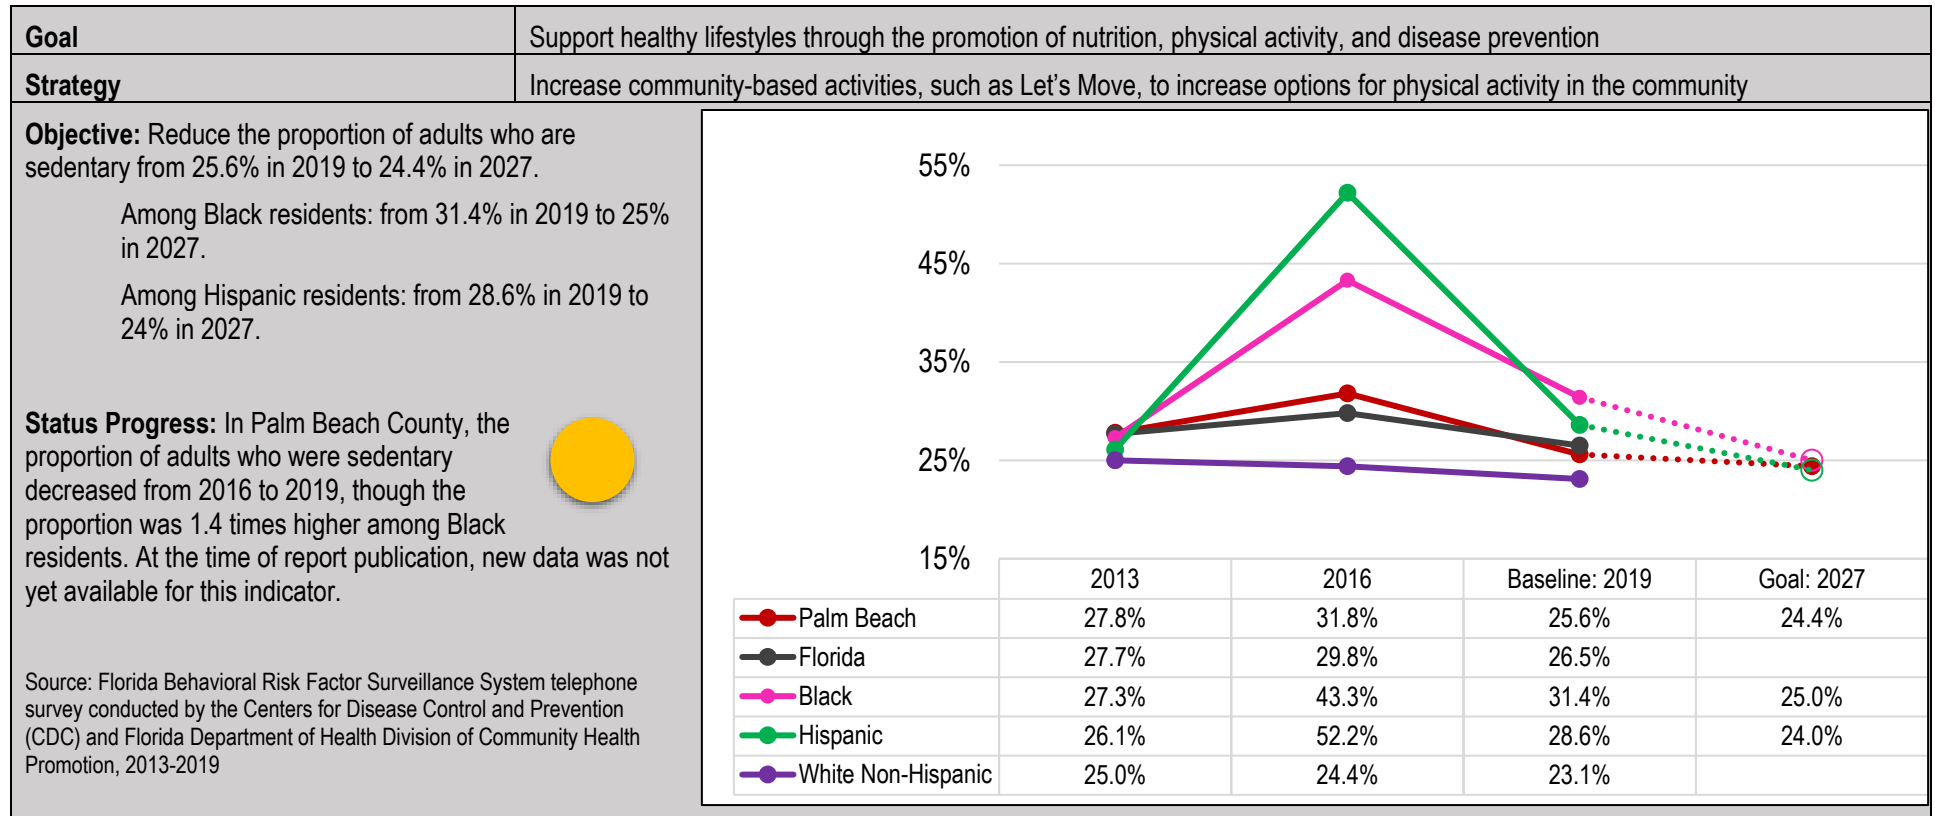

# Goal 1: Support Healthy Lifestyles through the Promotion of Nutrition, Physical Activity, and Disease Prevention

## Strategy 2: Increase Community-Based Activities, Such as Let’s Move, to Increase Options for Physical Activity in the Community

The table below shows the Palm Beach County Community Health Advisory Council’s progress toward implementing Chronic Disease Self-Management activities under the second strategy of goal one. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 2: Priority Area 1 - Goal 1 - Strategy 2

**Objective:** Increase the proportion of students who were physically active for at least 60 minutes on all 7 of the past 7 days (middle and high school students) from 18.1% in 2020 to 19.5% in 2027.

Among Black students: from 14.4% in 2020 to 16.5% in 2027.

Among Hispanic students: from 16% to 17.5% in 2027

**Status Progress:** In 2022, the proportion of Palm Beach County students overall who met this level of physical activity decreased to 17.8%, increased to 15.8% among Black students, and increased to 16.8% among Hispanic students.

Chronic Disease Self-Management Goal 1 Strategy 2	Activities	Key Action Steps	Baseline	Progress	Key Partners
	Expand existing community campaigns promoting activity and exercise using programs such as Let's Move	Increase Let's Move activities from one month of activities (March) to a 12-month campaign	Not applicable	<b>31 events</b> hosted with more than <b>30,000 individuals</b> served, and over <b>103,487,227 minutes</b> of activity logged	Palm Health Foundation
	Promote exercise programs, especially for those who have arthritis or are at-risk for falls	Promote the YMCA exercise program	40 participants	<b>86 participants</b> (46 with Arthritis) in the YMCA exercise programs	YMCA of South Palm Beach County
	Increase partnerships to implement programs at different sites and locations	3 sites	<b>5 YMCA sites</b> and locations that implement community health programs		

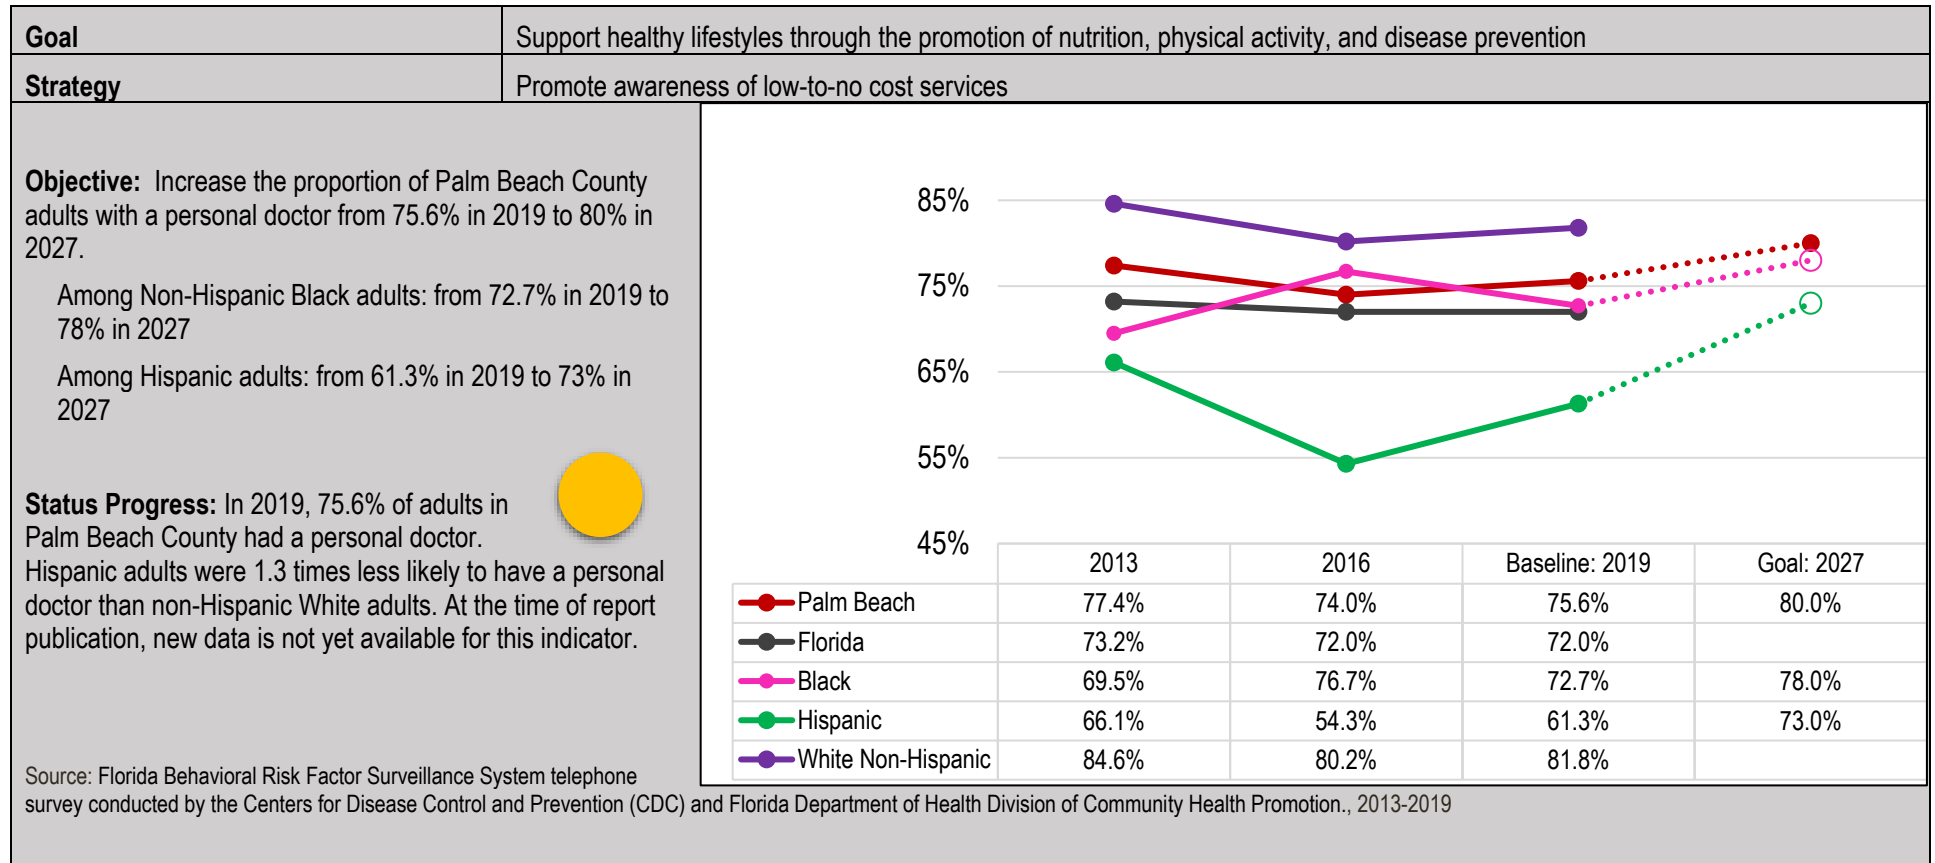

Chronic Disease Self-Management Goal 1 Strategy 2	Activities	Key Action Steps	Baseline	Progress	Key Partners
	Promote exercise programs, especially for those who have arthritis or are at-risk for falls (Cont'd)	Promote the Area Agency on Aging Tai Chi Moving for Better Balance and Tai Chi for Arthritis programs	32 participants	<b>61 participants</b> in the Area Agency on Aging Tai Chi Moving for Better Balance and Tai Chi for Arthritis programs	Area Agency on Aging
		Promote the Silver Sneakers exercise program for older adults	1614 participants	<b>518 unduplicated participants</b> in the Silver Sneakers Exercise program for older adults	Ruth and Norman Rales Jewish Family Services
		Identify and train additional volunteers to implement programs in the community	8 volunteers	<b>205 volunteers</b> implementing programs in the community	Area Agency on Aging
Promote the American Heart Association Kids Heart Challenge to engage students in physical activity and educate students about keeping their hearts and brains healthy and helping others	Increase participation in the challenge among elementary, middle, and high school youth	104 schools participating	<b>105 schools participating</b> in the challenge	American Heart Association	
		5,510 students registered	<b>5,879 students registered</b> to participate in the challenge		
		357 students instructed	<b>567 students instructed</b> in CPR/Warning Signs of Stroke		

# Goal 1: Support Healthy Lifestyles through the Promotion of Nutrition, Physical Activity, and Disease Prevention

## Strategy 3: Promote Awareness of Low-to-No Cost Services

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Chronic Disease Self-Management activities under the third strategy of goal one. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 3: Priority Area 1 - Goal 1 - Strategy 3

		Activities	Key Action Steps	Baseline	Progress	Key Partners
<p style="text-align: center;">Chronic Disease Self-Management Goal 1 Strategy 3</p>	<p>Create a social marketing campaign to promote awareness that “every resident has access to a medical home.” Including information sharing related to low-to-no cost services</p>	<p>Share educational materials related to low-to-no cost services</p>	<p>4 materials, 45 events attended</p>	<p><b>5 materials</b> shared related to low-to-no cost services, <b>19 events attended</b></p>	<p>Caridad Center Palm Beach Civic Assoc Health Committee Palm Beach County Medical Society</p>

## Goal 2: Reduce the Burden of Chronic Diseases by Improving Quality of Life, Minimizing Symptoms, and Preventing Unnecessary Hospitalizations

Strategy 1: Support Community-Based Interventions to Effectively Prevent and Manage Chronic Diseases, such as Chronic Disease Self-Management Programs for Residents, and Strategy 2: Support System-Level Interventions to Effectively Prevent and Manage Chronic Diseases, such as Culturally Adapted Health Care and Federally Qualified Health Center (FQHC) Chronic Disease Management Best Practices

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing the Chronic Disease Self-Management strategies under goal two. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 4: Priority Area 1 - Goal 2 - Strategies 1 and 2

<b>Goal</b>	Reduce the burden of chronic diseases by improving quality of life, minimizing symptoms, and preventing unnecessary hospitalizations.																																								
<b>Strategies</b>	Support community-based interventions to effectively prevent and manage chronic diseases, such as Chronic Disease Self-Management programs for residents. Support system-level interventions to effectively prevent and manage chronic diseases, such as culturally adapted health care and Federally Qualified Health Center (FQHC) chronic disease management best practices.																																								
<p><b>Objective:</b> Reduce hospitalizations from diabetes or with diabetes from a rate of 1,713 per 100,000 (2020) to a rate of 1,695.0 per 100,000 by 2027.</p> <p>Among Black residents: from 3,287.4 in 2020 to 3214.8 in 2027</p> <p>Among Hispanic residents: from 1,768.2 in 2020 to 1673.8 in 2027</p> <p><b>Status Update:</b> In 2021, the age-adjusted rate of hospitalizations from diabetes was 1,807.0 in Palm Beach County. Glaring disparities were seen by race, with Black residents hospitalized at 2.7 times the rate of White residents. Data was not reported for Hispanic residents in 2021.</p>  <p>Source: Florida Agency for Health Care Administration (AHCA), 2018-2021</p>	 <table border="1" data-bbox="814 1209 1990 1430"> <thead> <tr> <th></th> <th>2018</th> <th>2019</th> <th>Baseline: 2020</th> <th>2021</th> <th>Goal: 2027</th> </tr> </thead> <tbody> <tr> <td>— Palm Beach</td> <td>1,813.9</td> <td>1,845.8</td> <td>1,713.0</td> <td>1,807.0</td> <td>1,695.0</td> </tr> <tr> <td>— Florida</td> <td>2,310.2</td> <td>2,314.2</td> <td>2,160.3</td> <td>2,258.3</td> <td></td> </tr> <tr> <td>— Black</td> <td>3,444.2</td> <td>3,613.3</td> <td>3,287.4</td> <td>3,473.4</td> <td>3,214.8</td> </tr> <tr> <td>— Hispanic</td> <td>1,855.0</td> <td>1,885.6</td> <td>1,768.2</td> <td></td> <td>1,673.8</td> </tr> <tr> <td>— White Non-Hispanic</td> <td>1,372.4</td> <td>1,373.1</td> <td>1,247.7</td> <td>1,297.3</td> <td></td> </tr> </tbody> </table>						2018	2019	Baseline: 2020	2021	Goal: 2027	— Palm Beach	1,813.9	1,845.8	1,713.0	1,807.0	1,695.0	— Florida	2,310.2	2,314.2	2,160.3	2,258.3		— Black	3,444.2	3,613.3	3,287.4	3,473.4	3,214.8	— Hispanic	1,855.0	1,885.6	1,768.2		1,673.8	— White Non-Hispanic	1,372.4	1,373.1	1,247.7	1,297.3

**Objective:** Reduce the age-adjusted coronary heart disease hospitalization rate from 175.1 per 100,000 (2020) to 122.1 per 100,000 in 2027.

Among Black residents: from 171.7 in 2020 to 139.6 in 2027

Among Hispanic residents: from 146.4 in 2020 to 108.4 in 2027

Among Non-Hispanic residents: from 176.9 in 2020 to 128.3 in 2027

**Status Update:** In 2021, the age-adjusted rate of hospitalizations from coronary heart disease increased to 180.5 per 100,000 population in Palm Beach County. Among Black residents the rate increased to 186.0 and Among Non-Hispanic residents the rate decreased to 157.2 per 100,000 population. Data was not reported for Hispanic residents in 2021.

Source: Florida Agency for Health Care Administration (AHCA), 2018-2021

**Objective:** Reduce hospitalizations from stroke from 176.0 per 100,000 (2020) to 160.5 per 100,000 in 2027.

Among Black residents from 305.0 in 2020 to 227.5 in 2027

Among Hispanic residents from 121.2 in 2020 to 95.1 in 2027

Among Non-Hispanic residents: from 181.5 in 2020 to 146.9 in 2027

**Status Update:** In 2021, the age-adjusted rate of hospitalizations from stroke increased to 184.9 in Palm Beach County. A 6.7% increase in hospitalizations was reported for Black residents, and a 19.1% decrease was reported for non-Hispanic residents from 2020 to 2021. Data was not reported for Hispanic residents in 2021.

Source: Florida Agency for Health Care Administration (AHCA), 2018-2021

**Objective:** Increase the proportion of adults with diabetes who have ever had diabetes self-management education from 69.7% in 2019 to 76.4% in 2027.

**Status Update:** In 2019, 69.7% of adults with diabetes in Palm Beach County had diabetes self-management education, slightly higher than in Florida overall. At the time of report publication, new data is not yet available for this indicator.

	Engage providers, including Federally Qualified Health Centers and free clinics, to meet chronic disease management best practices	Promote and assist in implementing provider policy, system, and environment changes focused on ensuring chronic disease management best practices are followed	3 clinical PSEs	<b>2 clinical PSEs</b> achieved to promote and assist in implementing provider policy, system, and environmental changes focused on ensuring chronic disease management best practices are followed	American Heart Association (AHA)

### **Culturally Adapted Health Care**

Culturally Adapted Health Care is a scientifically supported evidence-based strategy that is proven to lead to improved health outcomes, mental health, health-related knowledge, chronic disease management, and cancer screening. Other beneficial outcomes from this strategy include increased patient satisfaction, reduced hospital utilization, improved quality of life, improved adherence to treatment, increased tobacco cessation, improved dietary habits, improved weight status, improved patient-provider communication, improved prenatal care, and reduced drug and alcohol use. Culturally adapted care can include culturally appropriate health education programs, culturally tailored life style interventions, and culturally competent and bilingual health workers. These strategies are tailored to patients' norms, beliefs, values, language, and literacy skills. Such efforts may include matching specialists to patients by race or ethnicity, adapting patient materials to reflect culture, language, or literacy skills, offering education via community health advocates, incorporating norms about faith, food, family, or self-image into patient care, and implementing patient improvement strategies. Finally, and of high importance, this strategy is also proven to decrease disparities.<sup>8</sup>

### **Chronic Disease Self-Management Programs**

Chronic Disease Self-Management (CDSM) program implementation is a scientifically supported evidence-based strategy proven to lead to improved health outcomes and quality of life, as well as increased healthy behaviors and self-efficacy for patients with chronic conditions. Other beneficial outcomes include improved mental health, chronic disease management, and care for chronic conditions, as well as reduced hospital utilization. Such programs allow patients to proactively manage health conditions and can improve patients' communication with physicians, ultimately enhancing their system of care. Educational and behavioral interventions are used to provide patients the tools and knowledge needed to actively manage their conditions. These strategies often focus on self-monitoring and medical management, decision-making, and/or adoption and maintenance of health-promoting behaviors.<sup>9</sup>

## Priority Area: Mental and Behavioral Health

### Mental and Behavioral Health – Why Address It?

Mental health encompasses emotional, psychological, and social well-being.<sup>10</sup> According to the Centers for Disease Control and Prevention (CDC), 11.3% of adults report regular feelings of worry, nervousness, or anxiety and 4.5% report experiencing depression. Poor mental health is associated with a variety of negative health outcomes, including reductions in life expectancy, quality of life, and financial stability, as well as an increased risk for intentional and unintentional injury, substance misuse and other behavioral health issues.<sup>11 12</sup>

In 2019, approximately 9.2% of adults in Palm Beach County reported having poor mental health on over 14 days of the past 30 days, and this proportion was higher among White (10.7%) and Black (9.6%) residents.<sup>13</sup> Furthermore, the rate of age-adjusted suicide deaths in the county was 13.9 per 100,000 population.<sup>14</sup> This rate was 2.6 times higher among White residents compared to their Black counterparts, and 2.2 times higher among non-Hispanic residents compared to their Hispanic counterparts.<sup>15</sup>

As previously mentioned, poor mental health increases one's risk for engaging in substance misuse. According to the CDC, drug overdoses continue to increase in the United States, with over 70,000 drug overdose deaths in 2019. Of those deaths, over 70% involved opioids.<sup>16</sup> Opioids may include prescription opioids (i.e. oxycodone, hydrocodone, morphine, and methadone) or illicit opioids (i.e. fentanyl, heroin). While opioids are classified as painkillers, illicit use of prescription or synthetic opioids has led to worrisome trends across the country and in Palm Beach County.<sup>17</sup> Locally, a stark disparity in substance use outcomes exists between the state of Florida and Palm Beach County. For instance, in Palm Beach County, the rate of age-adjusted drug poisoning deaths was 1.2 times higher and the rate of age-adjusted opioid deaths was 1.6 times higher compared to Florida in 2020.

Moreover, poor mental health and heavy substance use increases the risk of an individual engaging in abusive behaviors, but the cycle does not end there. Evidence shows that the mental anguish that domestic and intimate partner violence survivors experience causes some to cope through substance use. Widely, research has found that substance use plays a pivotal role in violent and abusive behaviors, and always worsens patterns of abuse.<sup>18</sup> In Palm Beach County, the rate of domestic violence offenses was 296.5 per

100,000 population in 2020. Of growing concern, human trafficking, which intersects in many ways with domestic violence, poor mental health, and substance use, has also exponentially increased.<sup>19</sup>

Thus, the Advisory Council selected Mental and Behavioral Health as a top priority due to the great impact on the overall wellbeing of an individual and their community. The following table shows the goals, objectives, strategies, and activities that will provide direction for the community health improvement planning efforts in the community for this priority area. The Plan also includes best practices, evidence-supported initiatives, and currently available community resources specific to this priority area.

Figure 23: Mental and Behavioral Health Priority Area Goals, Strategies, Objectives, and Activities

Priority Area: Mental and Behavioral Health			
<b>Goal 1: Reduce the prevalence of mental and emotional disorders.</b>			
<b>Strategy: Promote and offer resources to enhance education and awareness of mental and emotional disorders, such as MHFA training, support groups, and community newsletters.</b>			
<b>Strategy: Promote behavioral health integration into primary care.</b>			
<b>Objective:</b> Decrease the percentage of adult residents who had poor mental health on 14 or more of the past 30 days from 9.2% in 2019 to 8.1% in 2027. (10.7% NH White in 2019 to 6.2% in 2027; 9.6% NH Black in 2019 to 5.6%; 5.7% Hispanic in 2019 to 2.9% in 2027)			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> MW1.2 <b>Heathy People 2030:</b> Goal – Improve mental health
<b>Objective:</b> Increase access to counseling and mental health services for uninsured or underinsured residents who have no other means to access treatment by 5% from 12,985 in FY 2020/2021 to 13,634 in FY 2026/2027.			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> Goal MW1 <b>Heathy People 2030:</b> MHMD-04; MHMD-05; MHMD-R01
<b>Objective:</b> Increase the percentage of children receiving mental health treatment services from 5.3 per 1,000 population aged 1-5 in 2020 to 7.0 per 1,000 population aged 1-5 in 2027.			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> MW2.3 <b>Heathy People 2030:</b> MHMD03; EMC-D06
Activities	Key action steps	Measures	Key partners
Increase the number of evidence-based mental health centered trainings offered to the community (i.e. Mental Health First Aid, Trauma-Informed Care, PACEs, etc.)	Promote available trainings such as: <ul style="list-style-type: none"> <li>• Mental Health First Aid (MHFA) trainings via “Mental Health Minis” trainings</li> <li>• Youth MHFA mini-trainings led by youth for youth</li> <li>• Positive and Adverse Childhood Experiences (PACEs)</li> <li>• Trauma-Informed Care</li> <li>• Mental Health workshops for parents, teachers, and childcare staff</li> </ul>	# trainings  # trained	<ul style="list-style-type: none"> <li>• Florida Department of Health in Palm Beach County</li> <li>• Alpert Jewish Family Services (MHFA)</li> <li>• Catholic Charities (MHFA)</li> <li>• National Alliance on Mental Illness in Palm Beach County (MFA – Integrated Resiliency Training)</li> <li>• Palm Beach County Behavioral Health Coalition (mini MHFA courses)</li> <li>• Center for Child Counseling (PACEs, TIC, Mental Health Workshops)</li> <li>• BeWellPBC (youth mini MHFA trainings)</li> <li>• Palm Beach County Youth Services</li> <li>• Palm Beach County Medical Society</li> </ul>

Activities	Key action steps	Measures	Key partners
Develop and promote more messaging focused on mental and behavioral health resources	Promote: <ul style="list-style-type: none"> <li>• Newsletters</li> <li>• Podcasts</li> <li>• The Well of PBC Magazine</li> <li>• Get Your Green On Campaign</li> <li>• Social media quick facts on mental health</li> <li>• Mental Health Awareness Month</li> <li>• Newspaper Op-Eds to increase awareness to broad audiences</li> <li>• A Way of Being with Children messaging</li> <li>• Tip sheets, videos, and workshops for parents and caregivers - Ways to Talk to Children, focusing on tough topics like suicide, war, school shootings, etc.</li> <li>• 211 media mentions</li> </ul>	# people reached through each item	<ul style="list-style-type: none"> <li>• Florida Department of Health in Palm Beach County</li> <li>• BeWellPBC</li> <li>• National Alliance on Mental Illness in Palm Beach County</li> <li>• Palm Beach County Behavioral Health Coalition</li> <li>• Palm Health Foundation</li> <li>• Health Care District of Palm Beach County</li> <li>• Boca Raton’s Promise</li> <li>• Mental Health America of the Palm Beaches</li> <li>• Birth to 22 Provider Network</li> <li>• Center for Child Counseling</li> <li>• 211 Palm Beach Treasure Coast</li> </ul>
Enhance support for family and care-givers	Promote mental health support groups, such as those offered by the National Alliance on Mental Illness in Palm Beach County Promote Area Agency on Aging senior and caregiver support groups, as well as free counseling for seniors Increase engagement in the AACY Caregiving Youth Project to support children by expanding to additional schools Promote the Children’s Services Council Psychoeducational support groups for children, teens, and families Promote support for caregivers through the Countywide Caregiver’s Club, the 211 Palm Beach County Treasure Coast Caregiver Support project for caregivers over the age of 18 years, and the 211 Palm Beach County Treasure Coast Sunshine Calls program	# participants # of support groups held # participants # caregivers # residents receiving a daily Sunshine call	<ul style="list-style-type: none"> <li>• National Alliance on Mental Illness in Palm Beach County</li> <li>• Palm Beach County Youth Services</li> <li>• Area Agency on Aging</li> <li>• Center for Child Counseling</li> <li>• Healthier Boynton Beach</li> <li>• 211 Palm Beach and Treasure Coast</li> <li>• Children’s Services Council</li> <li>• BeWellPBC</li> <li>• Healthier Boynton Beach</li> <li>• Florida Department of Health in Palm Beach County</li> <li>• Caridad Center</li> </ul>

Activities	Key action steps	Measures	Key partners
Promote resources for physicians related to mental health and substance use disorders	Promote SBIRT and other screening tools such as MAST	# trained	<ul style="list-style-type: none"> <li>• Palm Beach County Behavioral Health Coalition</li> <li>• Palm Health Foundation</li> <li>• BeWell PBC</li> <li>• Mental Health America of the Palm Beaches</li> <li>• Palm Beach County Medical Society</li> <li>• Palm Beach Pediatrics</li> <li>• Center for Child Counseling</li> <li>• 211 Palm Beach County Treasure Coast</li> <li>• Center for Child Counseling</li> <li>• Florida Department of Health in Palm Beach County</li> </ul>
	Engage additional providers and practices in the Palm Beach County Community Health Advisory Council	# providers and practices engaged in the Advisory Council	
Expand the integration of behavioral health through collaboration among providers	Raise awareness related to integration of behavioral health into primary care settings among providers through the promotion of universal mental health screenings followed by linkages to needed care/resources at primary care appointments. Focus efforts on Pediatric Integrated Care <b>policy</b> work and training/resource opportunities	# policies developed related to pediatric integrated care	
	Promote pediatric integration by providing mental health education, crisis intervention, support groups, and therapy that is integrated into pediatric offices and concurrent with school and community support	# screened for mental health concerns  # mental health consultations	

**Goal 2: Reduce the burden of mental and emotional disorders.**

**Strategy: Develop and distribute resources for the medical community to encourage and enhance early diagnosis and linkages to care.**

<p>While we understand that hospitalizations are an important entry point for care, we recognize that appropriate and timely interventions can reduce hospitalization rates from crisis situations and enhance quality of life for residents in need of care.</p> <p><b>Objective:</b> Decrease the age-adjusted rate of hospitalizations from mental disorders from 999.2 per 100,000 in 2020 to 985.0 in 2027.</p> <p><b>Objective:</b> Decrease the age-adjusted rate of emergency department visits from mental disorders from 975.8 per 100,00 population in 2020 to 965.0 in 2027.</p>	<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> MW1.1  <b>Healthy People 2030:</b> Goal – Improve mental health</p>
<p><b>Objective:</b> Reduce non-fatal intentional self-harm injury hospitalizations from 29.9 per 100,000 in 2020 to 22.5 in 2027.</p>	<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> MW4.1  <b>Healthy People 2030:</b> IVP-19</p>
<p><b>Objective:</b> Reduce age-adjusted deaths from suicide from 10.3 per 100,000 population in 2020 to 8.9 per 100,000 in 2027.</p>	<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> MW 4.2, MW 4.3, ISV 1.4  <b>Healthy People 2030:</b> MHMD-01</p>

Activities	Key action steps	Measures	Key partners
Provide educational materials for providers	Develop and disseminate provider resources, such as decision trees	# providers who receive resources	<ul style="list-style-type: none"> <li>• Palm Beach County Medical Society</li> <li>• Florida Department of Health in Palm Beach County</li> </ul>
Build workforce capacity in an effort to increase access and affordability for community members	<p>Identify partnering agencies to collaborate in funding efforts</p> <p>Mobilize a grant writing team to seek and obtain funding to build workforce capacity for low-cost and sliding-fee-scale services</p> <p>Secure funding to build workforce capacity increase the availability of providers for low-cost and sliding-scale-fee services</p>	# funding opportunities identified	<ul style="list-style-type: none"> <li>• Ruth &amp; Norman Rales Jewish Family Services, Inc.</li> </ul>
Promote initiatives to reduce suicide	Promote the Zero Suicide initiative among providers	# providers who receive information	<ul style="list-style-type: none"> <li>• Florida Department of Health in Palm Beach County</li> <li>• Southeast Florida Behavioral Health Network</li> <li>• Primary Care and Emergency Medical Providers</li> <li>• 211 Palm Beach County Treasure Coast</li> </ul>
	Increase the utilization of crisis support resources, such as suicide crisis lines	# suicide related calls in Palm Beach County	

**Goal 3: Reduce the prevalence of substance use disorders and drug overdoses.**

**Strategy: Promote resources for support system members, community members, and those engaging in substance use to enhance community conversations around behavioral health and link residents to needed resources.**

**Objective:** Reduce the proportion of residents who engage in illicit drug use from 11.77% in 2020 to 11.00% in 2027.

**National/state priorities alignment:**  
**Florida SHIP:** MW3.5  
**Healthy People 2030:** SU-01, SU-05, SU-07

Activities	Key action steps	Measures	Key partners
Promote training to increase education and understanding among family members, caregivers, and support networks	Promote CRAFT (Community Reinforcement and Family Training)	<p># trainings</p> <p># trained</p>	<ul style="list-style-type: none"> <li>• Palm Beach County Behavioral Health Coalition</li> <li>• Palm Beach County Community Services Substance Use Steering Committee</li> </ul>

## Priority Area 2: Mental and Behavioral Health- Objective and Activity Progress Tracking

The following sections of this report highlight progress toward achieving priority area objectives. Status indicators are as follows:

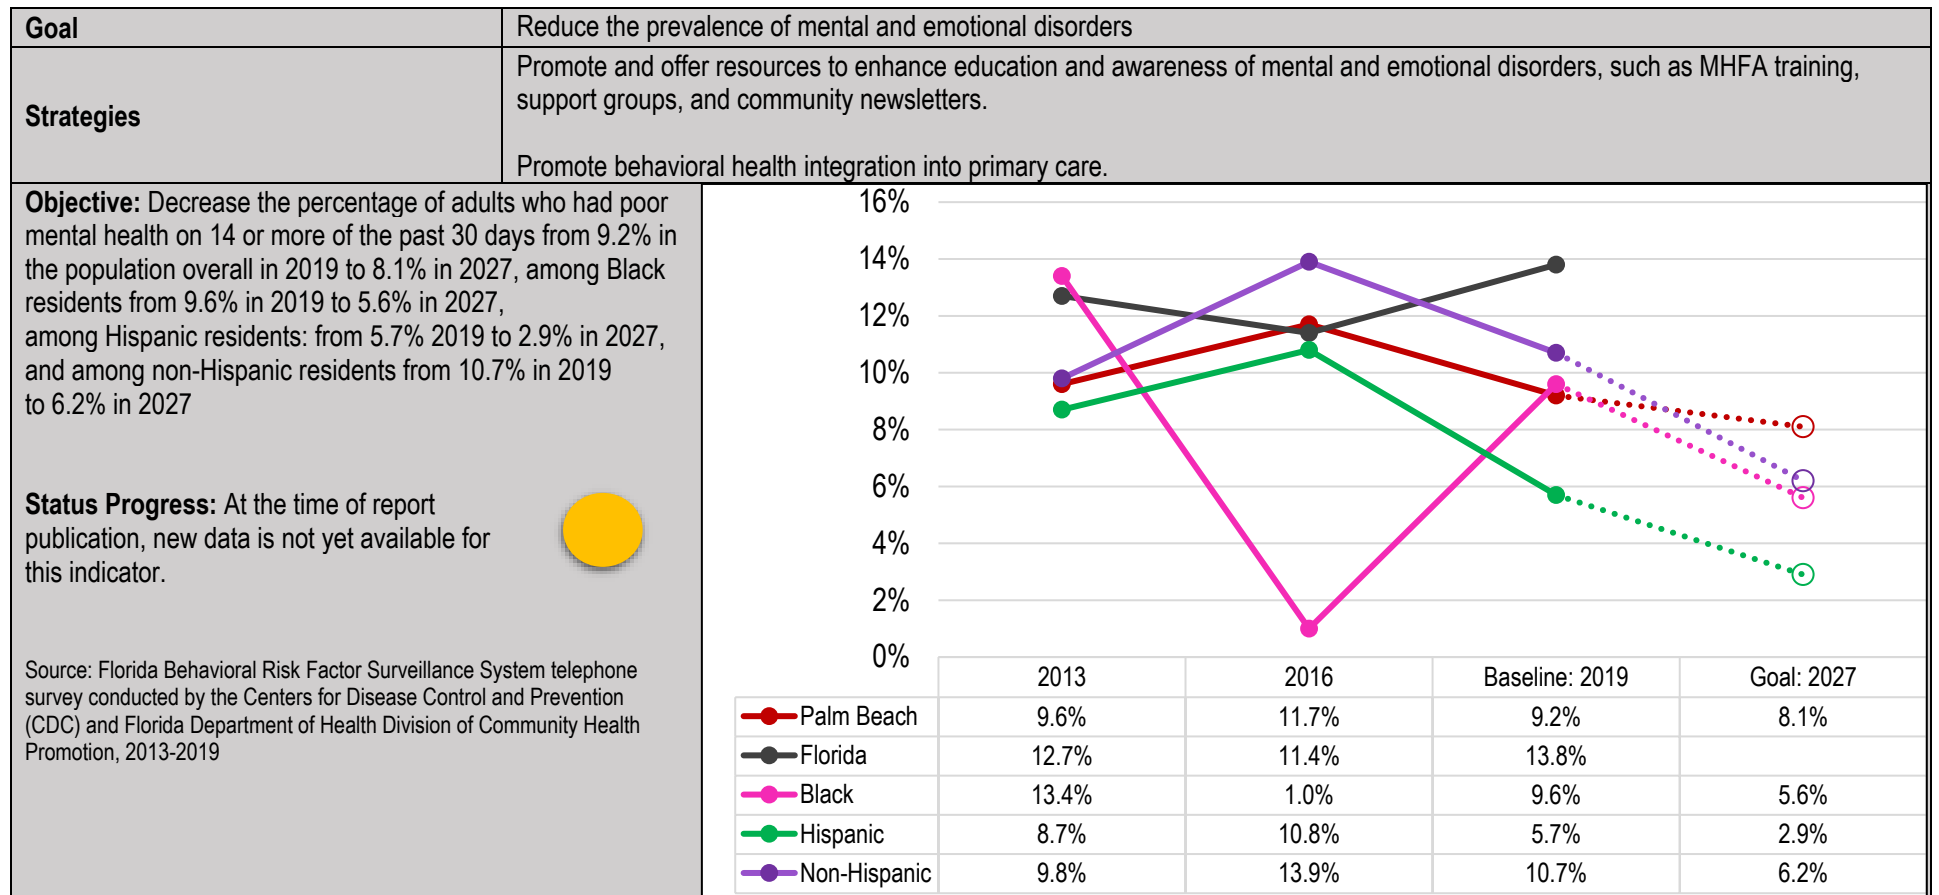

-  = Little to no movement towards objective target
-  = Some progress towards meeting the objective target
-  = Reached or surpassed objective target

## Goal 1: Reduce the Prevalence of Mental and Emotional Disorders

Strategy 1: Promote and Offer Resources to Enhance Education and Awareness of Mental and Emotional Disorders, such as MHFA Training, Support Groups, and Community Newsletters, and Strategy 2: Promote Behavioral Health Integration into Primary Care

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the first and second strategy of goal one. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 5: Priority Area 2 - Goal 1 - Strategies 1 and 2

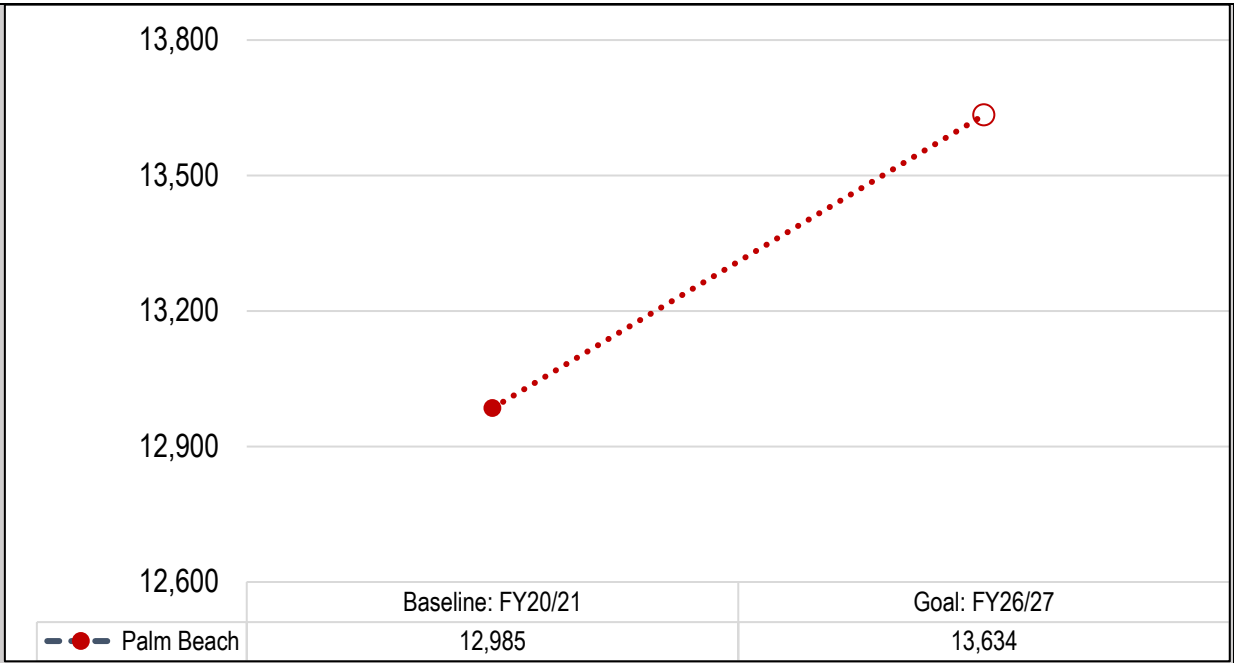

**Objective:** Increase access to counseling and mental health services for uninsured or underinsured residents who have no other means to access treatment by 5% from 12,985 in FY 2020/2021 to 13,634 in FY 2026/2027.

**Status Progress:** At the time of report publication, new data is not yet available for this indicator.

Source: Southeast Florida Behavioral Health Network, 2022

**Objective:** Increase the rate of children receiving mental health treatment services from 5.3 per 1,000 population aged 1-5 in 2020 to 7.0 per 1,000 population aged 1-5 in 2027.

**Status Progress:** In 2021, the rate of children receiving mental health treatment services decreased to 2.2 per 1,000 population.

	Expand the integration of behavioral health through collaboration among providers	Raise awareness related to integrating behavioral health into primary care settings among providers through the promotion of universal mental health screenings followed by linkages to needed care/resources at primary care appointments. Focus efforts on Pediatric Integrated Care policy work and training/resource opportunities	10 policies	<b>7 policies</b> were developed related to pediatric integrated care	Center for Child Counseling
Promote pediatric integration by providing mental health education, crisis intervention, support groups, and therapy that is integrated into pediatric offices and concurrent with school and community support		639 screened; 673 consultations held	<b>256 were screened</b> for mental health concerns and <b>302 mental health consultations</b> were held to promote pediatric integration by providing mental health education, crisis intervention, support groups, and therapy that is integrated into pediatric offices and concurrent with school and community support	Center for Child Counseling	

## Goal 2: Reduce the Burden of Mental and Emotional Disorders

### Strategy 1: Develop and Distribute Resources for the Medical Community to Encourage and Enhance Early Diagnosis and Linkages to Care

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the first strategy of goal two. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 6: Priority Area 2 - Goal 2 - Strategy 1

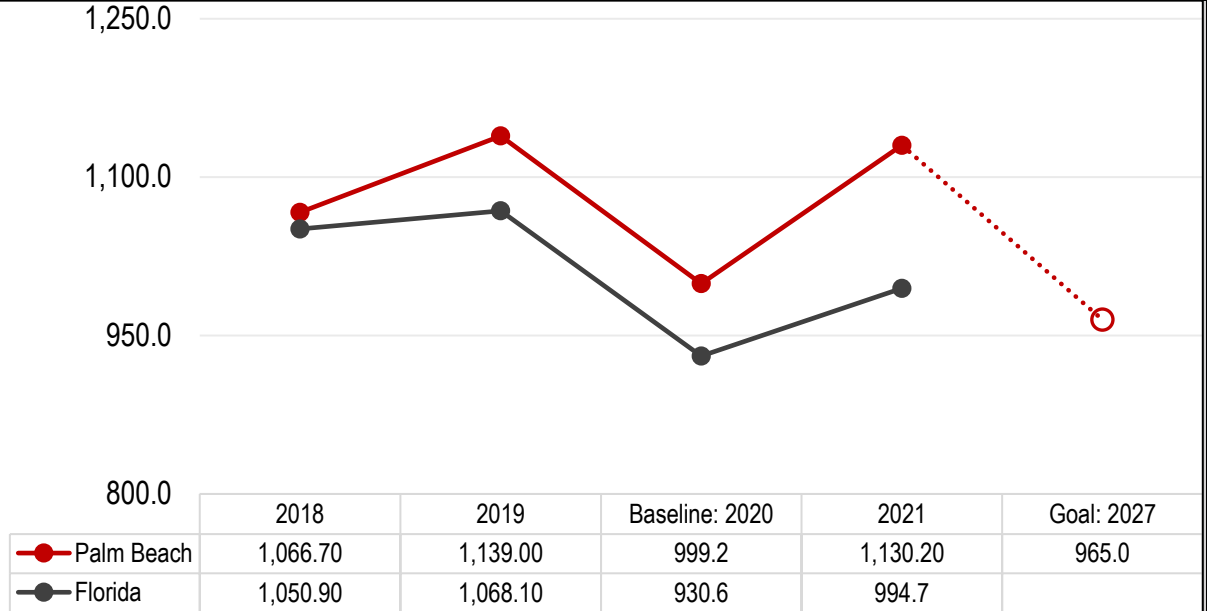

**Objective:** Decrease the age-adjusted rate of emergency department visits from mental disorders from 975.8 per 100,000 population in 2020 to 965.0 in 2027.

**Status Progress:** The age-adjusted rate of Emergency Department visits from mental disorders increased from 2020 to 2021 in Palm Beach County, continuing to exceed the state's rate overall.

Source: Florida Agency for Health Care Administration, 2018-2021

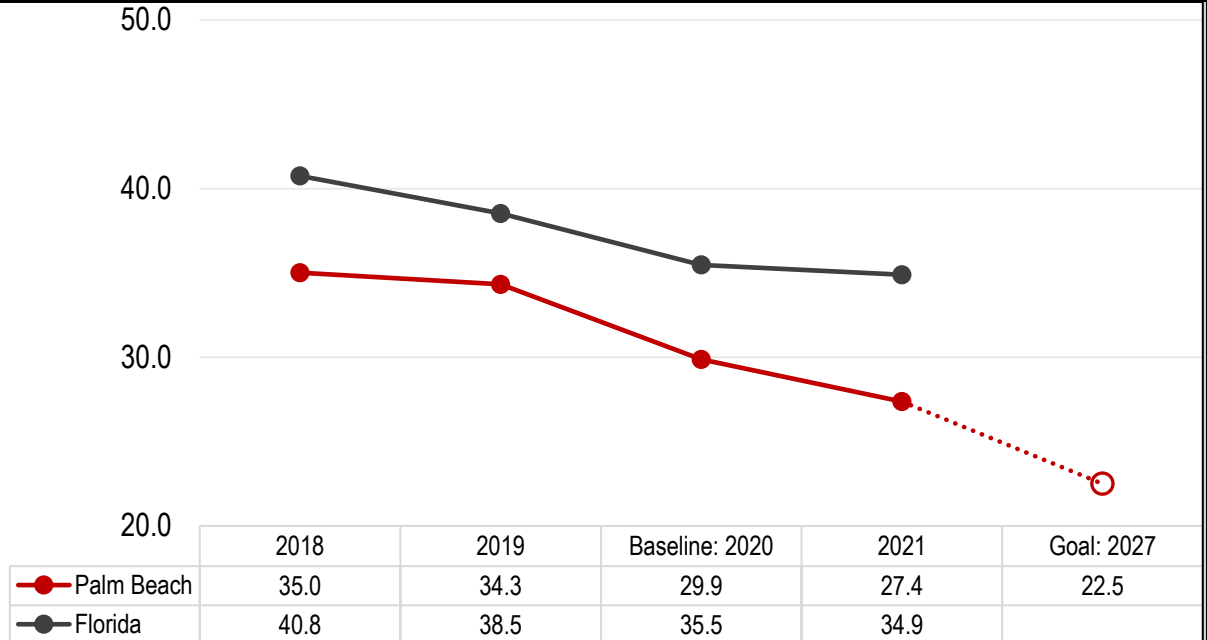

**Objective:** Reduce non-fatal intentional self-harm injury hospitalizations from 29.9 per 100,000 in 2020 to 22.5 in 2027.

**Status Progress:** In Palm Beach County, the rate of non-fatal intentional self-harm injury hospitalizations decreased to 27.4 per 100,000 in 2021.

Source: Florida Agency for Health Care Administration, 2018-2021

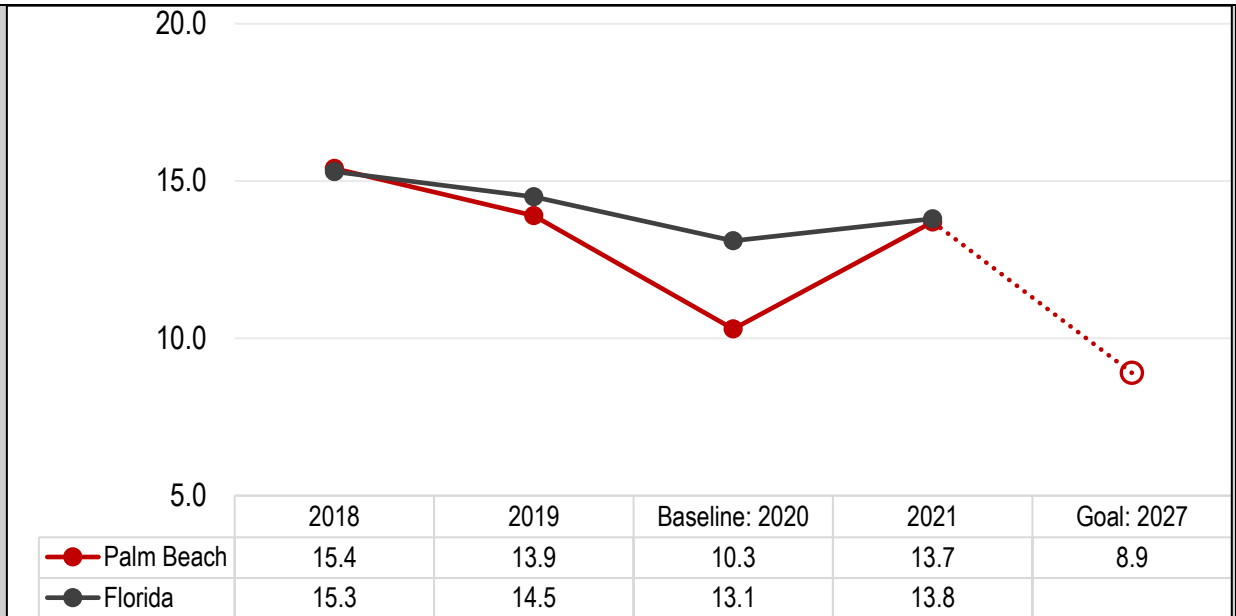

**Objective:** Reduce age-adjusted deaths from suicide from 10.3 per 100,000 population in 2020 to 8.9 per 100,000 in 2027.

**Status Progress:** The rate of age-adjusted deaths from suicide in Palm Beach County spiked in 2021.

Source: Florida Agency for Health Care Administration, 2018-2021

Mental and Behavioral Health Goal 2 Strategy 1	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Provide educational materials for providers	Develop and disseminate provider resources, such as decision trees	22 providers	<b>8,554 providers</b> received resources	PBC Medical Society
	Build workforce capacity in an effort to increase access and affordability for community members	Identify partnering agencies to collaborate in funding efforts	0 funding opportunities	<b>1 funding opportunity</b> identified	Ruth and Normal Rales Jewish Family Services
		Mobilize a grant writing team to seek and obtain funding to build workforce capacity for low-cost and sliding-fee-scale services			
Promote initiatives to reduce suicide	Secure funding to build workforce capacity increase the availability of providers for low-cost and sliding-scale-fee services				
	Promote the Zero Suicide initiative among providers	56 providers	<b>63 providers</b> received information	Southeast Florida Behavioral Health Network	
	Increase the utilization of crisis support resources, such as suicide crisis lines	801 suicide-related calls	<b>757 suicide-related calls</b> in Palm Beach County	211	

### Goal 3: Reduce the Prevalence of Substance Use Disorders and Drug Overdoses

#### Strategy 1: Promote Resources for Support System Members, Community Members, and Those Engaging in Substance Use to Enhance Community Conversations Around Behavioral Health and Link Residents to Needed Resources

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the first strategy of goal three. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 7: Priority Area 2 - Goal 3 - Strategy 1

<b>Goal</b>	Reduce the prevalence of substance use disorders and drug overdoses							
<b>Strategy</b>	Promote resources for support system members, community members, and those engaging in substance use to enhance community conversations around behavioral health and link residents to needed resources							
<p><b>Objective:</b> Reduce the proportion of residents who engage in illicit drug use from 11.77% in 2020 to 11.00% in 2027.</p> <p><b>Status Progress:</b> Substate estimates are no longer available from the data source, SAMHSA, due to methodological concerns with combining 2020 data with data from 2018 and 2019. The Advisory Council is exploring this objective further.</p> <p>Source: SAMHSA</p>		<table border="1"> <tr> <td></td> <td data-bbox="1020 1230 1509 1271">Baseline: 2020</td> <td data-bbox="1509 1230 2001 1271">Goal: 2027</td> </tr> <tr> <td data-bbox="779 1271 1020 1336">..... Mental and Behavioral Health Goal 3 Strategy 1	Promote training to increase education and understanding among family members, caregivers, and support networks	Promote CRAFT (Community Reinforcement and Family Training)	15 trainings; 240 participants	<b>9 CRAFT trainings</b> held with <b>169 participants</b>	PBC Behavioral Health Coalition
	Increase PACE's training opportunities to build resiliency in the community	Provide PACEs training to increase protective factors and social supports	31 trainings; 1,261 participants	<b>17 PACES trainings</b> held with <b>844 participants</b>	Center for Child Counseling PBC Youth Services
	Increase awareness of supportive services	Promote accessible services, including: <ul style="list-style-type: none"> <li>• The Hub</li> <li>• Rebel Recovery</li> <li>• National Alliance on Mental Illness in Palm Beach County support groups</li> <li>• BeWellPBC</li> <li>• AA meetings</li> <li>• Drop-in programs</li> <li>• Peer recovery support specialists</li> <li>• Congregate meals for seniors with Area Agency on Aging</li> <li>• Center for Child Counseling Psychoeducational Support Groups for children, teens, parents, and Caregivers</li> </ul>	35 Newsletters 384 Promotional materials/ resources 343 Group meetings	<b>43 Newsletters</b> <b>306 Promotional materials/Resources</b> distributed <b>350 Group meetings</b> in community settings, such as faith-based groups or community events	211 Area Agency on Aging BeWellPBC Birth to 22 Caridad Center Center for Child Counseling The HUB Mental Health American of the Palm Beaches Palm Health Foundation PBC Behavioral Health Coalition PBC Youth Services

## Goal 4: Reduce the Burden of Substance Use Disorders and Drug Overdoses

### Strategy 1: Increase Partnerships and Training Related to Drug Misuse Across the Community and Healthcare System

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the first strategy of goal four. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 8: Priority Area 2 - Goal 4 - Strategy 1

**Objective:** Reduce non-fatal overdose emergency department visits among Palm Beach County residents from 3,141 in 2020 to 2,950 in 2027.

**Status Progress:** Non-fatal overdose emergency department visits increased slightly in Palm Beach County from 2018 to 2021.

Source: FL Health CHARTS Substance Use Dashboard, Florida Department of Health, 2018-2021

**Objective:** Reduce non-fatal overdose hospitalizations among Palm Beach County residents from 1,825 in 2020 to 1,736 in 2027.

**Status Progress:** In Palm Beach County in 2021, non-fatal overdose hospitalizations reached a four-year high, with 1,936 hospitalizations.

Source: FL Health CHARTS Substance Use Dashboard, Florida Department of Health, 2018-2021

**Objective:** Reduce the age-adjusted rate of drug overdose deaths among Palm Beach County residents from 50.4 per 100,000 population to 40.1 per 100,000 population in 2027.

**Status Progress:** The age-adjusted rate of drug overdose deaths in Palm Beach County decreased from 50.4 in 2020 to 45.4 per 100,000 in 2021.

Source: FL Health CHARTS Substance Use Dashboard, Florida Department of Health, 2018-2021

**Objective:** Reduce the age-adjusted death rate from opioid overdoses in Palm Beach County from 47.1 per 100,000 population in 2020 to 39.0 in 2027.

**Status Progress:** The age-adjusted death rate from opioid overdoses decreased in Palm Beach County from 47.1 to 40.2 per 100,000 population.

Source: FL Health CHARTS Substance Use Dashboard, Florida Department of Health, 2018-2021

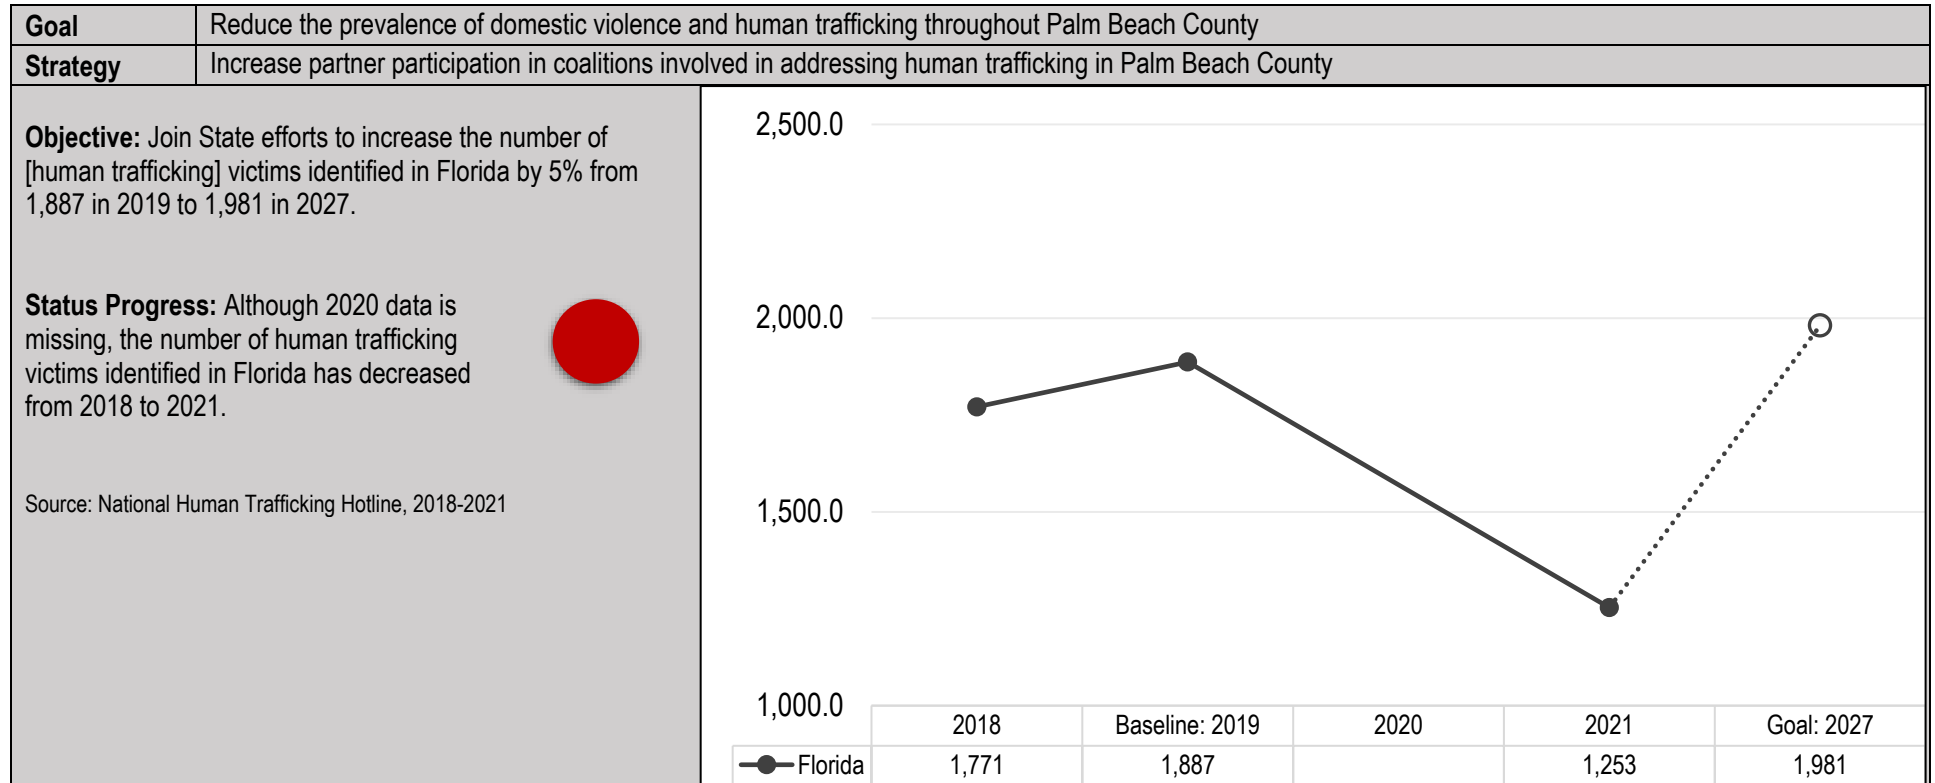

Mental and Behavioral Health Goal 4 Strategy 1	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Increase entity collaboration to conduct trainings for healthcare providers on key drug issues	Increase: <ul style="list-style-type: none"> <li>Partnerships with new agencies</li> <li>Narcan trainings</li> <li>PBCMS Physician trainings (with CME's)</li> </ul>	11 partners	<b>11 partners</b> who conduct trainings for healthcare providers on key drug issues	Rebel Recovery T. Leroy Jefferson Medical Society
			19 trainings	<b>23 trainings</b> held on Overdose Response/Naloxone and Harm Reduction	
	Increase education related to drug misuse for school age youth and their parents	Conduct youth school-based education for drug misuse	211 trainings; 11,576 trained	<b>206 drug prevention trainings</b> held with <b>11,828 children and adults trained</b>	Rebel Recovery PBC Behavioral Health Coalition PBC School District
Narcan Distribution events	Promote Narcan distribution events within the county	7,176 Narcan kits	<b>9,910 Narcan kits</b> distributed within the county	Rebel Recovery Health Care District PBC	

## Goal 5: Reduce the Prevalence of Domestic Violence and Human Trafficking Throughout Palm Beach County

### Strategy 1: Increase Partner Participation in Coalitions Involved in Addressing Human Trafficking in Palm Beach County

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the first strategy of goal five. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 9: Priority Area 2 - Goal 5 - Strategy 1

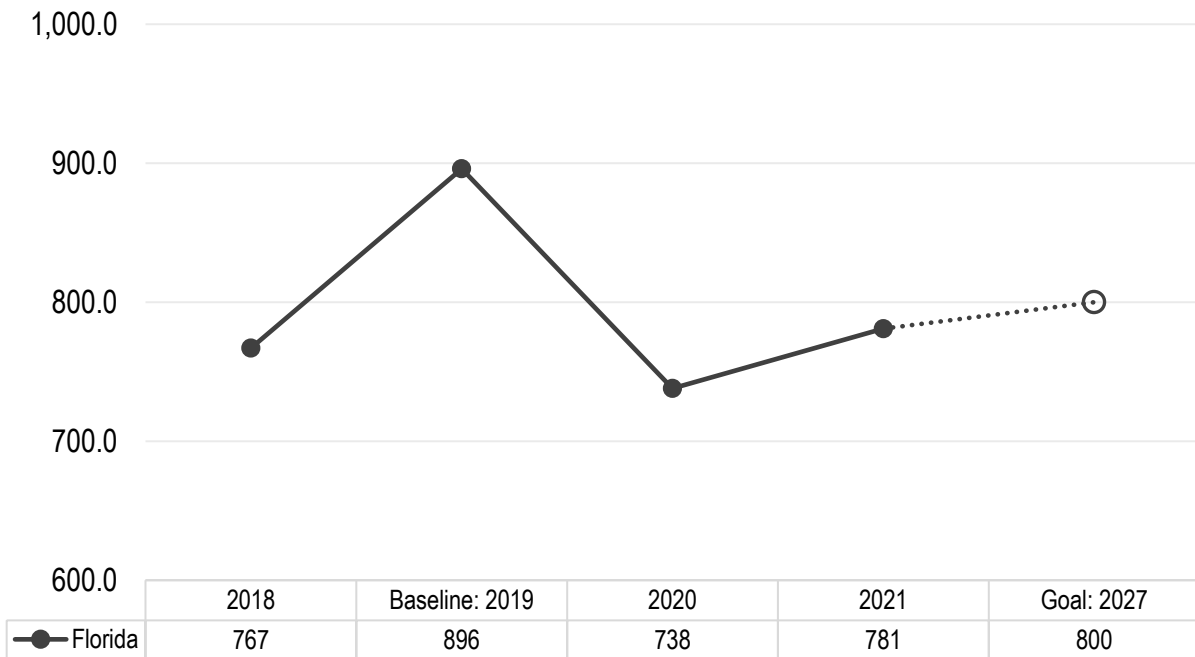

**Objective:** Join State efforts to reduce the number of sex trafficking cases in Florida from 896 in 2019 to 800 in 2027.

**Status Progress:** In Florida, the number of sex trafficking cases reported has decreased since the implementation of the CHIP.

Source: National Human Trafficking Hotline, 2018-2021

	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
<b>Mental and Behavioral Health</b> Goal 5 Strategy 1	Promote broad engagement among community partners on human trafficking coalitions and taskforces throughout the county	Increase engagement on South Florida Human Trafficking Taskforce Increase engagement on Human Trafficking Coalition of the Palm Beaches Increase engagement on Palm Beach HT Task Force	<i>Baseline data pending</i>	21 community partners involved with the Catholic Charities Bakhita Empowerment Program	Catholic Charities Human Trafficking Coalition of the Palm Beaches Human Trafficking Taskforce of South Florida PBC Human Trafficking Taskforce

## Goal 5: Reduce the Prevalence of Domestic Violence and Human Trafficking Throughout Palm Beach County

### Strategy 2: Increase Partner Engagement in Coalitions Involved in Addressing Domestic and Intimate Partner Violence in Palm Beach County

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Mental and Behavioral Health Priority Area activities under the second strategy of goal five. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 10: Priority Area 2 - Goal 5 - Strategy 2

Mental and Behavioral Health Goal 5 Strategy 2	Activities <sup>20</sup>	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Increase awareness of services available to all persons affected by domestic and family violence	Promote the availability of community-based services available to all residents affected by domestic violence	Baseline data is not yet available	Progress data is not yet available	AVDA PBC Victim's Services Ruth and Norman Rales Jewish Family Services
	Increase the provision of social support available to survivors	Promote the Domestic Violence Council of Palm Beach County Weekly Sexual Assault Support Groups	Baseline data is not yet available	Progress data is not yet available	AVDA

<sup>20</sup> The Palm Beach County CHIP Advisory Council meets biannually to review the CHIP to determine if modifications or revisions are needed to reflect changing priorities, resources, and opportunities. Activities under this goal/strategy are being revised by the Advisory Council to better capture the work being done and increase impact. As such, the progress measures are not currently applicable.

### **Behavioral Health Primary Care Integration**

Behavioral Health Primary Care Integration is a scientifically supported evidence-based strategy that has been found to improve mental health and quality of life, as well as increase adherence to treatment, patient engagement, and patient satisfaction. Other potential beneficial outcomes include reduced drug and alcohol use. This strategy focuses on bringing mental and substance use screenings and treatments into primary care settings, ultimately increasing linkages to care and detecting and addressing issues in early stages. Such efforts may include care coordination between providers, case managers, and specialists, as systems integration is vital in creating cohesive networks and increasing effective connections as needed. Integrated and coordinated care approaches can improve response to treatment, increase satisfaction, and improve mental health outcomes across the lifespan.<sup>21</sup>

### **Mental Health Benefits Legislation**

Mental Health Benefits Legislation is a scientifically supported evidence-based strategy that is proven to increase access to mental health services and to increase the provision of substance use disorder treatment. Other potential beneficial outcomes include improved mental health and reduced deaths by suicide. Such legislation works to regulate health insurance to ultimately increase access to mental health services, including substance use disorder treatment. Legislation that includes parity requirements has also been shown to be effective in increasing appropriate utilization of mental health services and substance use disorder treatment. Reduced prevalence of poor mental health and increased diagnosis of mental health conditions have also been seen with such efforts. Parity ensures that health insurance plans do not impose greater restrictions for mental health coverage as compared to physical health coverage, which works to address stigma and create an upstream approach to addressing mental health and substance use.<sup>22</sup>

### **Extracurricular Activities for Social Engagement**

Increasing extracurricular activities for social engagement is a scientifically supported evidence-based strategy rated to increase self-esteem and improve youth behavior. Other potential beneficial outcomes include increasing self-confidence and improving social skills and social networks. As the Palm Beach County Community Health Advisory Council identified social isolation as a key factor in mental and behavioral health issues throughout the county, this strategy offers an effective intervention for increasing protective factors that promote positive mental and behavioral health in residents. Extracurricular activities may include any organized social, art, or physical activities for school-aged youth outside of regular school time. School, community, or religious organizations may host clubs, music groups, student councils, debate teams, theater programs, volunteer programs, sports, and youth groups to foster social cohesion and enhance positive social behaviors. Supportive environments, age-appropriate structures, positive

relationships between participants and staff, and diverse activities can lead to enhanced outcomes, such as improved student outcomes.<sup>23</sup>

### **Mental Health First Aid**

Mental Health First Aid is an evidence-based training course that is likely to decrease mental health related disparities and teaches community members how to help individuals who are experiencing mental and behavioral health issues, such as anxiety, depression, and substance misuse. The curriculum includes strategies for identifying mental health related signs and symptoms and guidance on how to appropriately respond. These trainings help people assess the risk for self-inflicted injury, provide judgement-free care, provide assistance and resources, and encourage both self-help and the seeking of needed professional services. MHFA has been adapted for different communities to aid in the provision of culturally appropriate care.<sup>24</sup>

### **Trauma-Informed Health Care**

Trauma-Informed Care (TIC) is an evidence-based strategy that requires a shift in organizational culture and policies. TIC posits that traumatic experiences impact paths for recovery and providers should take client-centered approaches, screen for a history of trauma, provide safe clinical environments, involve clients in decision-making, and take extra care to avoid re-traumatization.<sup>25</sup>

## Priority Area: Access and Linkage to Health and Human Services

### Access and Linkage to Health and Human Services – Why Address It?

Addressing the social determinants of health improves both access to health and human services and health outcomes. As an example, increasing one's economic stability increases their ability to afford healthy food and adequate health care.<sup>26</sup> Inversely, barriers to health care, such as limited transportation access, low health literacy, and financial instability, may lead to residents delaying necessary care, increased financial burden associated with costlier emergency care, preventable disease progression, and premature death.<sup>27</sup> Thus, increasing health insurance coverage, transportation options, and access to health and human services plays a pivotal role in reducing health disparities.<sup>28</sup> In Palm Beach County, approximately 13% of residents are uninsured, with much higher proportions reported among Black residents (17.2%) and Hispanic residents (24.1%).<sup>29</sup> Additionally, in 2019, 15.8% of Palm Beach County residents could not see a primary care doctor due to cost, with the rate of preventable hospitalizations at 875.4 per 100,000 population.<sup>30</sup>

Still, once residents gain the ability to access care, navigating the healthcare system can pose additional challenges. To further illustrate, residents who face barriers and struggle to identify appropriate providers, schedule appointments, submit documentation, and understand insurance claims, experience undue stress and confusion, also leading to delayed or missed care. However, implementing a Community Health Worker model to support residents with navigating the health care system can facilitate successful entry points of care. Research shows that Community Health Workers and/or Patient Navigators improve health literacy and adherence to screening recommendations, diagnosis follow-ups, and treatment. These navigators are also shown to improve overall quality of life for patients, to eliminate barriers to care, and to be effective in decreasing disparities for historically marginalized populations, including Black residents, Native American residents, Latino residents, and residents with limited English proficiency.<sup>31</sup>

Due to the barriers that persist in the county, the Advisory Council selected Access and Linkage to Health and Human Services as a top priority to increase the provision and receipt of timely and adequate care throughout the lifespan, from birth through adulthood, and improve disparate health outcomes. The following table shows the goals, objectives, strategies, and activities that will provide direction for the community health improvement planning efforts in the community for this priority area. The Plan also includes best practices, evidence-supported initiatives, and currently available community resources specific to this priority area.

Figure 24: Access and Linkage to Health and Human Services Priority Area Goals, Strategies, Objectives, and Activities

<b>Priority Area: Access and Linkage to Health and Human Services</b>			
<b>Goal 1: Improve access to services, including the supporting of the social determinants of health.</b>			
<b>Strategy: Increase awareness of available resources and services through social marketing and awareness campaigns.</b>			
<b>Objective:</b> Increase the livability index transportation score from 42/100 in 2022 to 48/100 in 2027 through the 561 Plan to improve transportation convenience, options, and safety.			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> SEC3.1 <b>Healthy People 2030:</b> PA-10, PA-11, EH-02
<b>Objective:</b> Increase the livability index housing score from 60/100 in 2022 to 65/100 in 2027 through initiatives that promote affordability, availability, and accessibility.			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> SEC 4.2 <b>Healthy People 2030:</b> SDOH-04
<b>Objective:</b> Reduce the unemployment rate from 6.1% in 2020 to 4.5% in 2027 (among Black residents from 9.2% in 2020 to 6% in 2027; among Hispanic residents from 6.2% in 2020 to 5.0% in 2027).			<b>National/state priorities alignment:</b> <b>Florida SHIP:</b> SEC 4.3 <b>Healthy People 2030:</b> SDOH-02
<b>Activities</b>	<b>Key action steps</b>	<b>Measures</b>	<b>Key partners</b>
561 Plan	Promote the 561 Plan	# goals met within the 561 Plan	<ul style="list-style-type: none"> <li>• Palm Beach Transportation Planning Agency</li> <li>• Palm Tran</li> <li>• Career Source Palm Beach County</li> <li>• Federally Qualified Health Centers</li> <li>• Healthier Jupiter</li> <li>• Palm Health Foundation</li> <li>• 211 PBC and Treasure Coast</li> <li>• Florida Department of Health in Palm Beach County</li> </ul>
Increase awareness and provide education related to resources	Conduct Community Health Worker outreach and share educational resources with residents at appointments, meetings, events, and more.	# residents reached with outreach and information dissemination	
Promote community engagement in identifying and addressing local issues	Promote community-led responses and advocacy, such as walk and bike audits	# responses/audits completed	

<b>Goal 2: Ensure the utilization of quality services and care at the appropriate time.</b>			
<b>Strategy: Promote early maternal and child health initiatives, such as the Children’s Services Council Healthy Beginnings System of Care.</b>			
<b>Strategy: Provide cultural competence trainings for health care professionals and health literacy interventions for residents to enhance understanding and tailored approaches to care.</b>			
<p>Adequate prenatal care significantly reduces both the risk of maternal morbidity (e.g., unhealthy gestational weight gain, prenatal smoking, premature membrane ruptures, and premature labor) and the risk for neonatal, infant and under-five mortality decreases significantly. The Palm Beach County Community Health Advisory Council is committed to improving maternal and infant health outcomes through increasing access to adequate prenatal care, but also other services, such as genetic counseling and inter-conception care.</p> <p><b>Objective:</b> Increase the proportion of births with adequate prenatal care based on the Kotelchuck Index from 68.1% in 2020 to 69.1% in 2027 (among Black residents: from 66.4% in 2020 to 68%; among Hispanic residents: 60.4% in 2020 to 65% in 2027).</p> <p><b>Objective:</b> Reduce the rate of severe maternal morbidity from 23.3 per 1,000 delivery hospitalizations in 2020 to 18.0 per 1,000 delivery hospitalizations in 2027.</p> <p><b>Objective:</b> Reduce infant mortality from 3.8 per 1,000 live births in 2020 to 3.0 per 1,000 live births in 2027 (among Black infants: from 6.3 per 1,000 live births in 2020 to 4.0 per 1,000 live births in 2027)</p>		<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> MCH2; MCH3  <b>Healthy People 2030:</b> MICH-02, MICH-04, MICH-08</p>	
<p>It is important to increase the proportion of residents who regularly attend primary care visits.</p> <p><b>Objective:</b> Increase the proportion of adults who had an annual medical checkup from 79.8% in 2019 to 82.7% in 2027.</p>		<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> SEC2.2  <b>Healthy People 2030:</b> AHS-07</p>	
<p><b>Objective:</b> Reduce the rate of preventable hospitalizations from 875.4 per 100,000 population in 2019 to 790.0 per 100,000 population in 2027.</p>		<p><b>National/state priorities alignment:</b>  <b>Healthy People 2030:</b> Goal – Prevent hospital visits</p>	
<p><b>Objective:</b> Reduce the proportion of adults who could not see a doctor in the last year due to cost from 15.8% in 2019 to 12.3% in 2027.</p>		<p><b>National/state priorities alignment:</b>  <b>Florida SHIP:</b> SEC2  <b>Healthy People 2030:</b> AHS-04</p>	
<b>Activities</b>	<b>Key action steps</b>	<b>Measures</b>	<b>Key partners</b>
Engage families in early childhood interventions	<p>Promote early childhood interventions such as:</p> <ul style="list-style-type: none"> <li>Children’s Services Council Healthy Beginnings</li> <li>Center for Child Counseling Infant Mental Health Program/Infant Mental Health training</li> </ul>	# engaged in programs	<ul style="list-style-type: none"> <li>Florida Department of Health in Palm Beach County</li> <li>Children’s Services Council</li> <li>Center for Child Counseling</li> </ul>

## Priority Area 3: Access and Linkage to Health and Human Services- Objectives and Activities Progress Tracking

The following section of this report highlights progress toward achieving priority area objectives and activities. Status indicators are as follows:

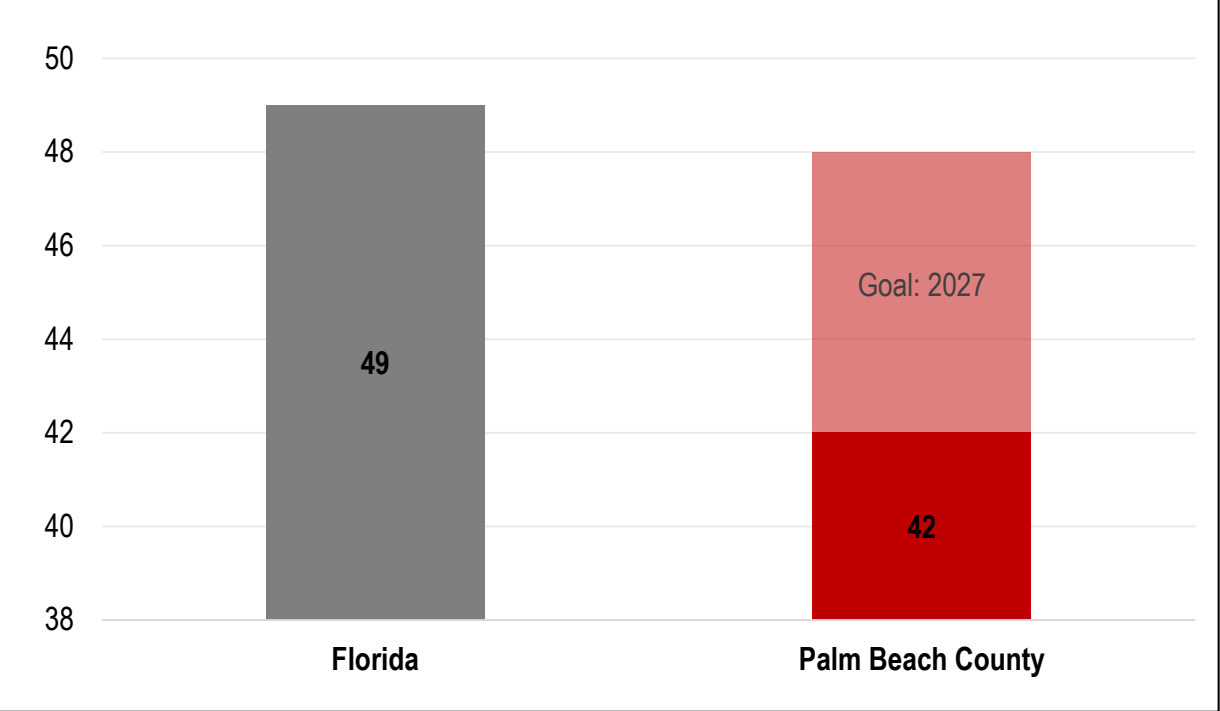

-  = Little to no movement towards objective target
-  = Some progress towards meeting the objective target
-  = Reached or surpassed objective target

## Goal 1: Improve Access to Services, Including the Supporting of the Social Determinants of Health

### Strategy 1: Increase Awareness of Available Resources and Services Through Social Marketing Awareness Campaigns

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Access and Linkage to Health and Human Services Priority Area activities under the first strategy of goal one. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 11: Priority Area 3 - Goal 1 - Strategy 1

Goal	Improve access to services, including the supporting of the social determinants of health									
Strategy	Increase awareness of available resources and services through social marketing and awareness campaigns									
<p><b>Objective:</b> Increase the livability index transportation score from 42/100 in 2022 to 48/100 in 2027 through the 561 Plan to improve transportation convenience, options, and safety.</p> <p><b>Status Progress:</b> In 2022, transportation metrics and policies focused on convenience, safety, and options scored better in the state of Florida than in Palm Beach County. At the time of report publication, new data is not yet available for this indicator.</p>  <p>Source: AARP Livability Index, 2022</p>	 <table border="1"> <caption>Livability Index Transportation Score Comparison</caption> <thead> <tr> <th>Entity</th> <th>Score</th> </tr> </thead> <tbody> <tr> <td>Florida</td> <td>49</td> </tr> <tr> <td>Palm Beach County</td> <td>42</td> </tr> <tr> <td>Goal: 2027</td> <td>48</td> </tr> </tbody> </table>		Entity	Score	Florida	49	Palm Beach County	42	Goal: 2027	48
Entity	Score									
Florida	49									
Palm Beach County	42									
Goal: 2027	48									

**Objective:** Increase the livability index housing score from 60/100 in 2022 to 65/100 in 2027 through initiatives that promote affordability, availability, and accessibility.

**Status Progress:** Housing metrics, such as affordability, access, availability, costs, and more scored better in Palm Beach County compared to the state of Florida overall in 2022. At the time of report publication, new data is not yet available for this indicator.

Source: AARP Livability Index, 2022

**Objective:** Reduce the unemployment rate from 6.1% in 2020 to 4.5% in 2027.  
 Among Black residents from 9.2% in 2020 to 6% in 2027  
 Among Hispanic residents from 6.2% in 2020 to 5.0% in 2027

**Status Progress:** In Palm Beach County, the unemployment rate decreased from 2018 - 2021, though the proportion was 1.4 times higher among Black residents.

Source: U.S. Census, 5-Year ACS Table S2301 (Employment Status), 2021

Access and Linkage to Health and Human Services Goal 1 Strategy 1	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	561 Plan	Promote the 561 Plan	0 goals met	<b>1 goal</b> in progress within the 561 plan	Palm Beach Transportation Agency
	Increase awareness and provide education related to resources	Conduct Community Health Worker outreach and share educational resources with residents at appointments, meetings, events, and more.	3,135 residents reached	<b>5,452 residents reached</b> with outreach and information dissemination	Health Council of Southeast Florida
	Promote community engagement in identifying and addressing local issues	Promote community-led responses and advocacy, such as walk and bike audits	0 audits completed, 1 report developed	<b>8 audits</b> completed by TPA on pedestrian and bicycle issues. <b>1 report</b> was developed through initiatives to engage / partner with community members	Community Partners of South Florida Palm Beach Transportation Agency

## Goal 2: Ensure the Utilization of Quality Services and Care at the Appropriate Time

Strategy 1: Promote Early Maternal and Child Health Initiatives, such as the Children’s Services Council Healthy Beginnings System of Care, and Strategy 2: Provide Cultural Competence Trainings for Health Care Professionals and Health Literacy Interventions for Residents to Enhance Understanding and Tailored Approaches to Care

The table below shows the Palm Beach County Community Health Advisory Council’s progress toward implementing Access and Linkage to Health and Human Services Priority Area activities under the first and second strategies of goal two. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 12: Priority Area 3 - Goal 2 - Strategies 1 and 2

**Objective:** Reduce the rate of severe maternal morbidity from 23.3 per 1,000 delivery hospitalizations in 2020 to 18.0 per 1,000 delivery hospitalizations in 2027.

**Status Progress:** In Palm Beach County, the proportion of severe maternal morbidities increased from 2018 - 2021.

Source: Florida Agency for Health Care Administration, 2018-2021

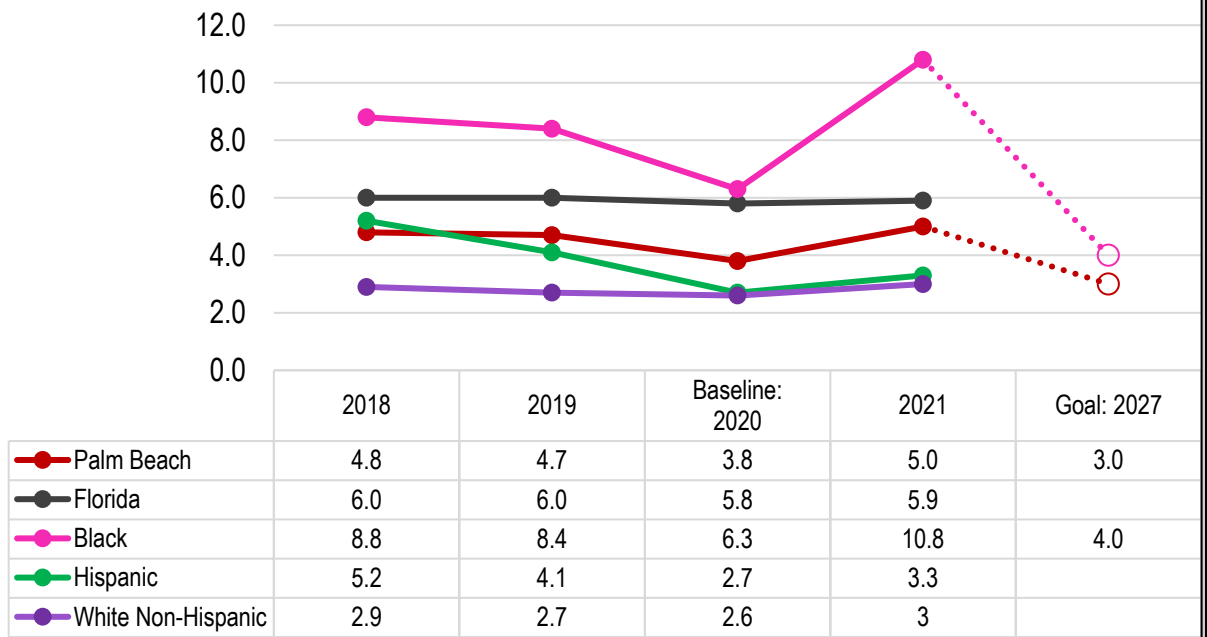

**Objective:** Reduce infant mortality from 3.8 per 1,000 live births in 2020 to 3.0 per 1,000 live births in 2027  
Among Black infants: from 6.3 per 1,000 live births in 2020 to 4.0 per 1,000 live births in 2027

**Status Progress:** In Palm Beach County, the infant mortality rate increased from 2018 - 2021, while the rate was 2.2 times higher among Black residents.

Source: FL Health CHARTS, Florida Department of Health, Bureau of Vital Statistics, 2018-2021

**Objective:** Increase the proportion of adults who had an annual medical checkup from 79.8% in 2019 to 82.7% in 2027.

**Status Progress:** In Palm Beach County, the proportion of adults who had a medical checkup decreased from 2016 - 2019.

Source: Florida Behavioral Risk Factor Surveillance System telephone survey conducted by the Centers for Disease Control and Prevention (CDC) and Florida Department of Health Division of Community Health Promotion. 2016-2019

**Objective:** Reduce the rate of ambulatory care sensitive hospitalizations from 875.4 per 100,000 population in 2019 to 790.0 per 100,000 population in 2027.

**Status Progress:** In Palm Beach County, the proportion of ambulatory care sensitive hospitalizations decreased from 2018 to 2021.

Source: Florida Agency for Health Care Administration (AHCA), 2018-2021

**Objective:** Reduce the proportion of adults who could not see a doctor in the last year due to cost from 15.8% in 2019 to 12.3% in 2027.

**Status Progress:** At the time of report publication, new data is not yet available for this indicator.

Access and Linkage to Health and Human Services Goal 2 Strategy 1-2	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)	
	Engage families in early childhood interventions Engage families in early childhood interventions	Promote early childhood interventions such as: <ul style="list-style-type: none"> <li>Children's Services Council Healthy Beginnings</li> <li>Center for Child Counseling Infant Mental Health Program/Infant Mental Health training</li> </ul>	16,572 participants	<i>*Reporting period: October 1 through September 30, 2020-2021, 2021-2022</i>	<b>17,224 participants</b> engaged in CSC's program	Children's Services Council
			185 families		<b>349 families</b> engaged in CFCC's program/training	Center for Child Counseling
		Conduct outreach related to support programs, such as the 211 Palm Beach County Treasure Coast Help ME Grow program	<i>Not applicable</i>	<b>131 pediatric offices</b> were connected to the program	211	

<p style="writing-mode: vertical-rl; transform: rotate(180deg);"> <b>Access and Linkage to Health and Human Services</b>            Goal 2            Strategy 1-2         </p>	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Provide Cultural Competence trainings for providers (including but not limited to frontline workers, allied healthcare professionals, community health workers, and physicians)	Engage academic institutions (including but not limited to nursing and medical schools, social work majors, and other relevant programs)	0 academic institutions	<b>2 academic institutions</b> engaged in the Palm Beach County Community Health Advisory Council	Health Council of Southeast Florida T. Leroy Jefferson Medical Society
		Promote available trainings and collaborate within the advisory group to identify and take part in trainings, such as health equity workshops and Race Equity Institutional trainings	5 trainings; 144 trained	<b>2 trainings</b> held with <b>94 trainees</b>	Caridad Center PBC Medical Society
	Ensure adequate representation in the healthcare service sector	Increase number of providers who speak multiple languages and are representative of communities served	39 providers	<b>39 providers</b> who speak multiple languages and are representatives of communities served	
	Provide health literacy training for residents	Increase awareness around services and resources (including but not limited to alternatives to emergency departments, accessing appropriate and timely care, and more)	0 trainings; 0 trained	<b>1 training</b> was held to increase awareness around services and resources (including but not limited to alternatives to emergency departments, accessing appropriate and timely care, and more), with <b>43 residents trained</b>	Caridad Center
Increase staff capacity to become patient advocates		24 staff	<b>9 new staff</b> trained to become patient advocates (33 total)		
Increase staff capacity to become patient advocates		112 educational materials	<b>45 educational materials</b> distributed to increase health literacy for residents		

### Goal 3: Support Health Care System Navigation

Strategy 1: Promote Tools, Trainings, and Resources to Support Health Care System Navigation, such as the Use of Patient Navigators, Systems such as Unite Us, and Trainings for Agencies Within the Local Public Health System to Increase Awareness of Available Services in the Community and the Utilization of Unite Us

The table below shows the Palm Beach County Community Health Advisory Council's progress toward implementing Access and Linkage to Health and Human Services Priority Area activities under the first strategy of goal three. The activities and key action steps are listed, along with the baseline and updated process measures to track implementation progress.

Table 13: Priority Area 3 - Goal 3 - Strategy 1

Access and Linkage to Health and Human Services Goal 3 Strategy 1	Activities	Key Action Step(s)	Baseline	Progress	Key Partner(s)
	Provide trainings for community health workers and providers to link residents to care using Unite Us and the No Wrong Door Framework	Conduct linkage to care and Unite Us trainings for Community Health Workers	56 providers	<b>63 providers trained</b> to link residents to care using Unite Us	Southeast Florida Behavioral Health Network
	Engage providers to increase engagement in Unite Us	Promote the Unite Us platform and engage providers in utilizing the platform	<i>Not applicable</i>	<b>94 unique organizations</b> utilizing the Unite Us platform	Health Care District
	Educate priority populations on insurance benefits and low-income subsidies	Distribute resources and educational materials related to insurance benefits and low-income subsidies	2,755 residents	<b>5,487 residents</b> educated on insurance benefits and/ or low-income subsidies	Area Agency on Aging
	Increase the proportion of residents receiving linkages to support services	Link residents to support services using the Unite Us platform	1,162 residents linked	<b>3,706 residents linked</b> through Unite Us	Health Care District

## Health Literacy Interventions

Health literacy interventions are effective in improving health-related knowledge and adherence to treatment. Other potential beneficial outcomes include improved patient-provider communication, improved mental health, and increased patient satisfaction. Further research is needed to confirm effects of this strategy, but this strategy has been tested more than once and results have trended positively. Overall, low levels of health literacy are associated with limited health-related knowledge, poor health outcomes, and poor health behaviors such as limited use of preventative care. This strategy is likely to decrease disparities, as racial and ethnic minority groups, elderly individuals, and residents with low levels of income and education are at higher risk of having low health literacy.<sup>32</sup> This strategy provides an opportunity to address both disparities and prevention, which are two key components of the Access and Linkage to Health and Human Services priority area.

## Patient Navigators

The deployment of Patient Navigators is a scientifically supported evidence-based strategy rated to increase screening and care, prenatal care, and increase overall access to care. These systems navigators provide culturally sensitive assistance and care coordination to help determine and address individual barriers for residents seeking care. These navigators guide patients through available medical, insurance, and social support systems. By assisting in eliminating barriers, this strategy can be effective for disadvantaged and minority populations, such as Black, Native American, and Latino residents, as well as non-English speakers and those with limited English proficiency. Strategies including patient navigators are shown to be likely to decrease disparities, making it an effective model for many goals within the CHIP, especially those related to the Access and Linkage to Health and Human Services priority area.<sup>33</sup>

## Cultural Competence Training for Health Care Professionals

Cultural competence training for health care professionals is a scientifically supported evidence-based strategy rated to increased cultural understanding and skills. Other potential beneficial outcomes include increased patient satisfaction and improved health outcomes. These strategies focus on enhancing and developing skills and knowledge for health care professionals around diversity, understanding and responding to cultural differences, and increasing awareness of cultural norms. These strategies are likely to decrease disparities.<sup>34</sup>

## **Protocol for Responding to and Addressing Patients' Assets, Risks & Experience (PRAPARE)**

PRAPARE is an evidence-based toolkit to engage patients in assessing and addressing social determinants of health. Screening for and addressing the social determinants of health has the potential to greatly reduce health disparities. An effective way to instill an upstream approach to care, this tool can be implemented within health care settings to assess and improve lived conditions and, ultimately, improve health outcomes.<sup>35</sup>

## Summary of Changes

Throughout the first year of the 2022 – 2027 Palm Beach County CHIP implementation, the Palm Beach County Community Health Advisory Council made updates to the CHIP plan to enhance the accuracy of activity reporting, and to increase their impact in the strategies that were outlined in the original version of the CHIP. As needed, partners proposed changes as a vote for the group’s approval. These votes were conducted via polls during the Advisory Council meetings and were discussed and approved by the group. The following table outlines the voted changes that took place during the first year of the Plan’s implementation.

<b>July 2022 - June 2023 Updates</b>
<p>The following general updates were made to the report for accuracy and clarity purposes:</p> <ul style="list-style-type: none"> <li>• The Executive Summary was updated to include more information on Advisory Council partner recruitment and community outreach (p.1).</li> <li>• The list of partnering organizations was updated to reflect new partners (p. 3).</li> <li>• A graphic was revised to include an updated description of the difference between equity and equality (p. 6).</li> <li>• The Introduction was updated to include information on community engagement in the CHA and CHIP processes (p. 4-5).</li> </ul>
<p>Data was updated to observe and track progress towards meeting the objectives under the Chronic Disease Prevention and Self-Management Priority Area, under indicators where a data update was available (p. 43-57).</p>
<p>The Chronic Disease Prevention and Self-Management Goals, Strategies, Objectives, and Activities for Priority Area #1 Table was updated to include additional Lead Community Partners.</p> <ul style="list-style-type: none"> <li>• Ruth and Norman Rales Jewish Family Services added as a key partner for the Silver Sneakers program under activity “Promote exercise programs, especially for those who have arthritis or are at-risk for falls” (p. 39).</li> <li>• Caridad Center added as a key partner under activity “Increase trainers for Chronic Disease Prevention and Self-Management programs and other related programs” (p. 42).</li> </ul> <p>The Chronic Disease Prevention and Self-Management Goals, Strategies, Objectives, and Activities for Priority Area #2 Table was updated as follows:</p> <ul style="list-style-type: none"> <li>• Under activity “Increase access to affordable, healthy fruits and vegetables,” measure “user-friendly guides distributed to residents for navigating SNAP/EBT and Fresh Access Bucks Programs” was updated to reflect the number of “partners that the resources were shared with” to track partner outreach (p. 38).</li> <li>• Under activity “Promote exercise programs, especially for those who have arthritis or are at-risk for falls,” measure “The number of participants in the YMCA Exercise Program” was expanded to include “the number of participants who have arthritis or are at-risk for falls” (p. 39).</li> <li>• Under activity “Promote the American Heart Association Kids Heart Challenge to engage students in physical activity and educate students about keeping their hearts and brains healthy and helping others,”             <ul style="list-style-type: none"> <li>○ Measure “students participating” was updated to “students who registered online” (p. 39).</li> <li>○ Measure “lesson plan downloads” was modified to capture the “number of students who were instructed in CPR/Warning Signs of Stroke” (p. 39).</li> </ul> </li> <li>• Within key activity “Share educational materials related to low-to-no cost services,” measure “events attended” was added to capture the number of events where this information was shared (p. 40).</li> <li>• Within activities “Provide Chronic Disease Self-Management programs for residents that include educational opportunities and guides/resources” and “Increase chronic disease screenings county-wide,”</li> </ul>

measures “residents trained” and “family caregivers trained” were updated to capture “number of participants trained” overall (p. 41).
Data was updated to observe and track progress towards meeting the objectives under the Mental Health and Substance Use Priority Area, under indicators where a data update was available (p. 68-86).
<p>The Mental Health and Substance Use Goals, Strategies, Objectives, and Activities for Priority Area #2 Table was updated to include additional Lead Community Partners:</p> <ul style="list-style-type: none"> <li>• Palm Beach County Medical Society was added to activity “Increase the number of evidence-based mental health centered trainings offered to the community” (p. 61).</li> <li>• Caridad Center added as a key partner under activities “Enhance support for family and care-givers” (p. 62) and “Increase awareness of supportive services” (p. 65).</li> <li>• Rebel Recovery added as a key partner under activities “Increase entity collaboration to conduct trainings for healthcare providers on key drug issues” (p. 66) and “Narcan distribution events” (p. 66).</li> <li>• The “Domestic Violence Council” was updated to “The Palm Beach County Domestic Violence Coordinated Community Response (DV CCR)” (p. 67).</li> <li>• Aid to Victims of Domestic Abuse (AVDA) was added to activities, “Increase awareness of services available to all persons affected by domestic and family violence” and “Increase the provision of social support available to survivors” (p. 67).</li> <li>• T. Leroy Jefferson Medical Society added to activity “Increase entity collaboration to conduct trainings for healthcare providers on key drug issues” (p. 66).</li> </ul> <p>The Mental Health and Substance Use Goals, Strategies, Objectives, and Activities for Priority Area #2 Table was updated as follows:</p> <ul style="list-style-type: none"> <li>• Within key activity “Promote Area Agency on Aging senior and caregiver support groups, as well as free counseling for seniors,” an additional measure was added “support group meetings held” (p. 62).</li> <li>• Under activity “Promote resources for physicians related to mental health and substance use disorders,” the key action step “Promote SBIRT” was expanded to include “other screening tools, such as MAST” (p. 63).</li> <li>• Under activity “Narcan distribution events”, measure was modified to reflect "Number of Narcan kits distributed" instead of events attended (p. 66).</li> </ul>
Data was updated to observe and track progress towards meeting the objectives under the Access and Linkage to Health and Human Services Priority Area objectives, under indicators where a data update was available (p. 94-104).
<p>The Access and Linkage to Health and Human Services Goals, Strategies, Objectives, and Activities for Priority Area #3 Table was updated as follows:</p> <ul style="list-style-type: none"> <li>• Under activity “Provide trainings for community health workers and providers to link residents to care using Unite Us and the No Wrong Door Framework” measure “informational materials distributed” was removed (p. 93).</li> <li>• Under activity “Engage providers to increase engagement in Unite Us,” measure was modified to capture the number of “unique organizations” utilizing the platform instead of providers (p. 93).</li> </ul>

## SUSTAINABILITY OF EFFORTS

The Palm Beach County Community Health Advisory Council will oversee the CHIP process over the course of the next five years. This group will meet regularly to assess progress towards goals, strategy implementation, and activities. Frequent communication will take place and annually updated reports will be published for Advisory Council members, stakeholders, and community members to monitor and evaluate progress throughout the CHIP cycle. The Community Health Improvement Plan is a “living” document and will be updated and revised as needed to ensure the Plan is meeting the best interests of those it serves and is leading towards optimal impact. The Palm Beach County Advisory Council will consider updates to the CHIP and engage in a formal voting process before any revisions are made. The Advisory Council, HCSEF, DOH-PBC, and HCD also welcome input, feedback, and insights from community members, stakeholders, and partners throughout the CHIP cycle to ensure the plan is reaching its full potential in improving the health of Palm Beach County residents. Additionally, the Advisory Council will be engaged in a data collection initiative to gain deeper insights into the factors that impact the mental health and overall well-being of Palm Beach County residents. Research on the lived experience of residents can provide a better understanding of the perspectives and experiences of residents with mental health issues. However, existing data is limited in this area, as qualitative data is not easily measured or counted. SenseMaker, a narrative-based method of research used to identify patterns through storytelling, will be used to gather qualitative data to inform current and future iterations of the CHIP. Advisory Council partners will be engaged in the development and distribution of the tool and will use the findings to inform decision-making processes. By engaging and leveraging diverse community partners and resources throughout the CHIP, the Advisory Council ensures CHIP sustainability and impact.

## TRACKING PROGRESS

The Palm Beach County Community Health Advisory Council will continuously monitor progress toward the CHIP goals, objectives, and strategies throughout the CHIP cycle. Formally, annual revisions will take place each year to update the CHIP with the most recently available data, findings, and progress towards the CHIP measures. On a bi-annual basis, HCSEF will reach out to key partners for activity measures and maintain and update an internal tracking system accordingly. Both objective data and activity measures will be reported at the Palm Beach County Community Health Advisory Council Meetings to provide progress snapshots to stakeholders, partners, and community members between the formal annual updates. HCSEF will report on the most recently available data indicators used to track the CHIP objectives. At these meetings the Community Health Advisory Council will also provide context and updates on CHIP objectives, strategies, and associated activities. All bi-annual updates will be outlined in the meeting materials distributed after the meeting to ensure equity in the distribution of information.

## GET INVOLVED

Community health improvement is improvement of the community and it is done largely by the community. To that end, all stakeholders and residents are invited to participate in improving Palm Beach County's health.

For more information or to get involved in the county's health improvement activities, please contact:
